Publisher Correction: Diversity and dynamism in the cerebellum

Chris I. De Zeeuw , Stephen G. Lisberger  and Jennifer L. Raymond 

Correction to: *Nature Neuroscience* <https://doi.org/10.1038/s41593-020-00754-9>, published online 7 December 2020.

In the version of this article initially published, in the section “Wiring diagram” the sentence beginning “These newly discovered recurrent pathways...” was repeated; and in the x paragraph of the section “Acquisition versus consolidation” the sentence beginning “A genetic modification...” should have read, “A genetic modification that causes climbing fibers to be directed to the ipsilateral, rather than contralateral, cerebellar cortex, reverses the direction selectivity of the climbing fiber responses of their Purkinje cell targets and, concomitantly, reverses the direction selectivity of their simple spike responses.” These errors have been corrected in the PDF and HTML versions of this article.
