Retraction of: *Nature Neuroscience* <https://doi.org/10.1038/s41593-020-0628-4>, published online 18 May 2020.

The authors are retracting this paper owing to issues with the integrity of the data presented. Specifically, inconsistencies in the flow cytometry data in Figs. 2d, 4b, 5c,d, 5g,h, 6a,b and 7a–d, and Extended Data Figs. 2b, 3a–i, and 6c–j were found, with selected experimental samples collected using different settings from their corresponding controls. Thus, the data in these figures do not reflect the true fluorescence of the samples in question. In addition, we have been unable to replicate the key *in vivo* findings in the paper, including those presented in Fig. 7e–h and Extended Data Fig. 8d–k. These concerns undermine our confidence in the study and we therefore wish to retract the article in its entirety. We deeply regret this incident and apologize to the scientific community.
