Retraction Note: 11,670 whole-genome sequences representative of the Han Chinese population from the CONVERGE project

Na Cai, Tim B. Bigdeli, Warren W. Kretzschmar, Yihan Li, Jieqin Liang, Jingchu Hu, Roseann E. Peterson, Silviu Bacanu, Bradley Todd Webb, Brien Riley, Qibin Li, Jonathan Marchini, Richard Mott, Kenneth S. Kendler & Jonathan Flint

Retraction of: *Scientific Data* <https://doi.org/10.1038/sdata.2017.11>, published online 14 February 2017

The authors are retracting this Data Descriptor because the whole genome sequencing data associated with this study are no longer available through public repositories. As these data are no longer available to other researchers, we feel that the purpose of this Data Descriptor is sufficiently undermined to require retraction. These data were withdrawn from the INSDC repositories after publication at the request of the sequencing centre, BGI, after a change in data sharing regulations in China. At this time, genotype data and other processed data files remain available through the European Variation Archive and figshare. All authors agree to this Retraction.
