Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-017-08401-3>, published online 15 August 2017

This Article contains an error in Figure 5, where the ‘undisturbed’ and ‘disturbed’ bars for the control sample are reversed. The correct Figure 5 appears below as Figure 1.

Figure 1. Effect of species origin (control = no seed addition, exotic = exotic seed addition, native = native seed addition) and disturbance (undisturbed, disturbed) on aboveground biomass. Data shown are least square means of repeated-measure linear mixed models $\pm$ SE averaged across two years. Note that aboveground biomass is given on a logarithmic scale.
