Author Correction: Potential impacts of climate change on habitat suitability for the Queensland fruit fly

Sabira Sultana¹, John B. Baumgartner¹, Bernard C. Dominiak², Jane E. Royer³ & Linda J. Beaumont¹

Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-017-13307-1>; published online 12 October 2017

The original version of this Article contained errors in the Abstract.

“The Queensland fruit fly, *Bactrocera tryoni* Froggatt (Qfly), is the most economically damaging insect pest of Australia’s horticultural industry, and its management is a key priority for plant protection and biosecurity.”

now reads:

“The Queensland fruit fly, *Bactrocera tryoni* (Froggatt) (Qfly), is the most economically damaging insect pest of Australia’s horticultural industry, and its management is a key priority for plant protection and biosecurity.”

The original version of this Article also contained errors in the Introduction.

“The Queensland fruit fly (Qfly), *Bactrocera tryoni* Froggatt, is the most devastating pest of Australia’s \$9 billion p.a. horticulture industry.”

now reads:

“The Queensland fruit fly (Qfly), *Bactrocera tryoni* (Froggatt), is the most devastating pest of Australia’s \$9 billion p.a. horticulture industry.”

These errors have now been corrected in the PDF and HTML versions of the Article.
