## Author Correction: Pollinator-mediated selection on flowering phenology and floral display in a distylous herb *Primula alpicola*

Lingling Chen<sup>1,2</sup>, Bo Zhang<sup>4</sup> & Qingjun Li<sup>3</sup>Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-017-13340-0>, published online 13 October 2017

This Article contains errors.

In Figure 1 the two fitted curves should be shown as dashed lines. The correct Figure 1 appears below.

**Figure 1.** Number of flowering individuals, fruit set (proportion of flowers forming a fruit), and pre-dispersal seed herbivory (proportion of damaged flowers and fruits) with date in one *P. alpicola* population at Lulang, China in 2016. -■- Number of individuals, ▲ Pre-dispersal seed herbivory ○ Fruit set, ---- Fitted curve.

In addition, in the Results section, under the subheading ‘Evidence for pollinator mediated natural selection’,

“Pollinators selected for more flowers and shorter scape plants ( $\Delta\beta_{poll} = -0.177$ ,  $P < 0.05$ ), accounting for all of the observed net selection ( $\beta_{ij} = -0.088$ ) (Table 3).”

should read:

<sup>1</sup>Key Laboratory of Tropical Forest Ecology, Xishuangbanna Tropical Botanical Garden, Chinese Academy of Science, Mengla, 666303, China. <sup>2</sup>University of Chinese Academy of Sciences, Beijing, 10049, China. <sup>3</sup>Laboratory of Ecology and Evolution Biology, State Key Laboratory in Conservation and Utilization of Bioresources in Yunnan, Yunnan University, Kunming, Yunnan, 650091, China. <sup>4</sup>College of Pratacultural Science, Gansu Agricultural University, Lanzhou, 730070, China. Correspondence and requests for materials should be addressed to Q.L. (email: [qingjun.li@ynu.edu.cn](mailto:qingjun.li@ynu.edu.cn))

“Pollinators selected for more flowers and shorter scape plants ( $\Delta\gamma_{poll} = -0.177$ ,  $P < 0.05$ ), accounting for all of the observed net selection ( $\gamma_{ij} = -0.088$ ) (Table 3).”

Furthermore, the title of Table 3,

“Correlational selection gradients ( $\mu \pm SE$ ) among open-pollinated and hand-pollinated plants and pollinator-mediated selection gradients, with proportion of damaged flowers and fruits as covariate, in one *P. alpicola* population at Lulang, China in 2016.”

should read:

“Correlational selection gradients ( $\gamma_{ij} \pm SE$ ) among open-pollinated and hand-pollinated plants and pollinator-mediated selection gradients, with proportion of damaged flowers and fruits as covariate, in one *P. alpicola* population at Lulang, China in 2016.”

The legend of Table 3,

“Pollinator-mediated selection  $\Delta\mu_{poll} = \gamma_{OP} - \gamma_{HP}$  and  $P$ -values associated with differences in selection gradients between pollination treatments (the trait  $\times$  pollination treatment interaction) in ANCOVA. Significant selection gradient estimates and their  $P$ -values are indicated in bold ( $P < 0.05$ ).”

should read:

“Pollinator-mediated selection  $\Delta\gamma_{poll} = \gamma_{OP} - \gamma_{HP}$  and  $P$ -values associated with differences in selection gradients between pollination treatments (the trait  $\times$  pollination treatment interaction) in ANCOVA. Significant selection gradient estimates and their  $P$ -values are indicated in bold ( $P < 0.05$ ).”

Finally, in Table 3, in the ‘Pollinator-mediated’ column,

“ $\Delta\mu_{poll}$ ”

should read:

“ $\Delta\gamma_{poll}$ ”
