Author Correction:

Characterisation and localisation of the endocannabinoid system components in the adult human testis

John E. Nielsen, Antoine D. Rolland, Ewa Rajpert-De Meyts , Christian Janfelt, Anne Jørgensen , Sofia B. Winge, David M. Kristensen, Anders Juul, Frédéric Chalmel, Bernard Jégou & Niels E. Skakkebaek

Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-019-49177-y>, published online 19 September 2019

This Article contains errors. Reference 51 was inadvertently omitted and is given below as Reference 1.

1. Sun, X. *et al.* Genetic loss of *Faah* compromises male fertility in mice. *Biol Reprod.* **80**, 235–242 (2009).

As a result, in the Introduction,

“Studies in rodents demonstrated the presence of CNR1 protein in germ cells, Leydig cells and possibly also Sertoli cells^{11,12,13,14,15}”

should read:

“Studies in rodents demonstrated the presence of CNR1 protein in germ cells, Leydig cells and possibly also Sertoli cells^{11,12,13,14,15}, CNR2 in germ cells and Sertoli cells, and FAAH mainly in spermatocytes and spermatids¹⁷”

“Ablation of *Cnr1* in mice had systemic and local effects on reproductive function; including decreased serum LH and testosterone levels¹⁶, but also disturbance of chromatin remodelling in spermatids^{13,14}”

should read:

“Ablation of *Cnr1* in mice had systemic and local effects on reproductive function; including decreased serum LH and testosterone levels¹⁶, but also disturbance of chromatin remodelling in spermatids^{13,14}. Genetic ablation of *Faah* led to elevated levels of AEA and caused impairment of fertility, which was rescued in mice with simultaneous knock-out of *Cnr1*¹”

Additionally, within the Results,

“The peritubular cell reaction was though weaker than in epithelial and myoid cells of blood vessels, which are known to express CNR1 (Fig. 2).”

should read:

“The peritubular cell reaction was though weaker than in epithelial and myoid cells of blood vessels (Fig. 2).”

Furthermore, within the Discussion,

Published online: 22 January 2020

“CNR1 and CNR2, or CNR1 alone were described in murine Leydig cells and murine and frog germ cells, leading to a proposal that activation of CNR1 in Leydig cells is likely involved in steroidogenesis, while CNR2 in spermatogonia B might promote meiotic entry in mice^{15,33,34}”

should read:

“CNR1 and CNR2, or CNR1 alone were described in murine Leydig cells and murine and frog germ cells, leading to a proposal that activation of CNR1 in Leydig cells is likely involved in steroidogenesis, while CNR2 in spermatogonia B might promote meiotic entry in mice^{15,33,34,1}”

Finally, in Figure 2, the bottom right histology image is incorrectly labelled because of an inadvertent rotation of the image. The correct Figure 2 appears below as Figure 1.

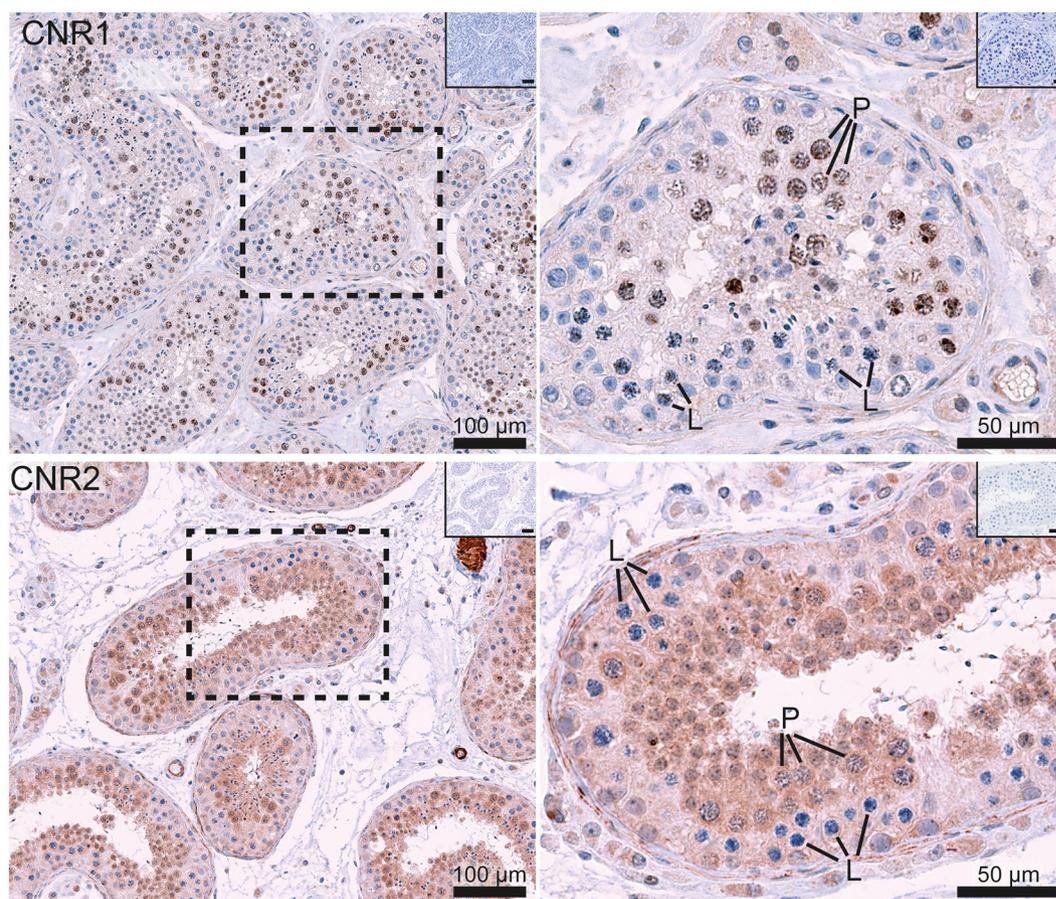

Figure 1.
