Publisher Correction: The Dopamine D5 receptor contributes to activation of cholinergic interneurons during L-DOPA induced dyskinesia

Julia Castello, Marisol Cortés, Lauren Malave, Andreas Kottmann , David R. Sibley, Eitan Friedman & Heike Rebholz

Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-020-59011-5>, published online 13 February 2020

This Article contains an error in the Introduction section.

“Hallmarks of the disorder are motor symptoms such as tremor, rigidity, bradykinesia and gait disturbances², which are a result of the selective degeneration of dopaminergic neurons within the substantia nigra pars compacta and thus not by but of dopamine depletion³.”

should read:

“Hallmarks of the disorder are motor symptoms such as tremor, rigidity, bradykinesia and gait disturbances², which are a result of the selective degeneration of dopaminergic neurons within the substantia nigra pars compacta and thus of dopamine depletion³.”
