Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-020-68258-x>, Published online 09 July 2020

This Article contains errors in Supplementary Figure S5, where an incorrect scale is given for the x axis in the inset graphs in panels a) and b). The correct Supplementary Figure S5 appears below as Figure 1.

Figure 1. Scatter plot diagrams indicating the ionic current blockade and dissociation dwell time, characterizing H1N1- α -HL (panel a) and HCV- α -HL (panel b) reversible interaction with a single α -HL nanopore, recorded at $\Delta V = +80$ mV in asymmetric salt buffers (*trans* 3M KCl / *cis* 0.1M KCl), at neutral pH. ssDNA fragments were added on the *cis* side of the membrane.
