Correction to: *Scientific Reports* <https://doi.org/10.1038/srep37305>, published online 16 November 2016

The original version of this Article contains an error in Figure 5, where the right image in the Control group is a duplication of the middle image in the 7.6 Gy+ DAMTC in panel A. The correct Figure 5 and accompanying legend appear below.

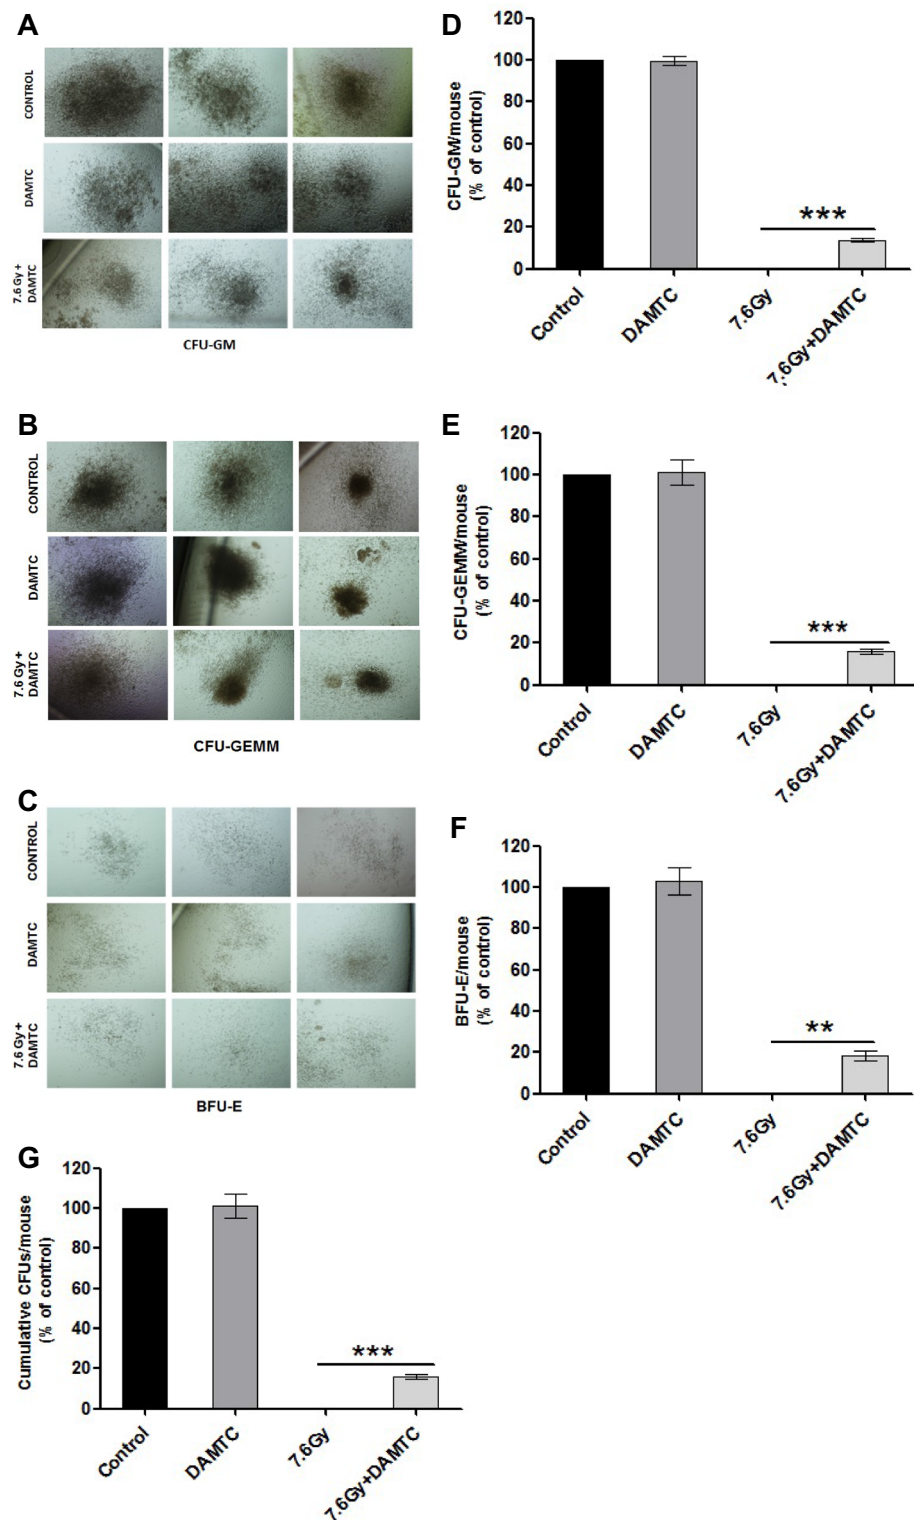

Figure 5. DAMTC facilitates expansion of hematopoietic progenitors in the BM of TBI mice. Effects of DAMTC on BM hematopoietic progenitor cells (HPCs) in TBI mice. Panels show colonies of hematopoietic progenitors (A) CFU-GM, (B) CFU-GEMM and (C) BFU-E after performing *ex-vivo* culturing on day 10 post TBI. Representative images of colonies from naïve, DAMTC and TBI + DAMTC mice are shown (cells from ten animals were examined in each group; n = 10). Percentages of (D) CFU-GM, (E) CFU-GEMM, (F) BFU-E and (G) cumulative CFUs are shown. All error bars indicate SEM. *P < 0.05; **P < 0.01; ***P < 0.001. Imaging of BM hematopoietic CFUs was done on day 12 of *ex-vivo* culture. Original magnification, $\times 40$ (A–C).
