Author Correction: Exosomes secreted by human adipose mesenchymal stem cells promote scarless cutaneous repair by regulating extracellular matrix remodelling

Lu Wang, Li Hu, Xin Zhou, Zehuan Xiong, Chenguang Zhang, Hassan M. A. Shehada, Bo Hu, Jinlin Song & Lili Chen

Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-017-12919-x>, published online 17 October 2017

The original version of this Article contained errors in Figure 3B, where the incorrect image was provided for the TGF- β 1/CM-Exo panel. In addition, in Figure 3D the images for the TGF- β 1/PBS and TGF- β 1/Exosomes panels were incorrect. The original version of Figure 3 appears below as Figure 1.

Furthermore, Figure 4B contained an error, where the original representative TIMP-1 blot was not the best match for the quantitative analysis. The original version of Figure 4 appears below as Figure 2.

Finally, full blot images were omitted as Supplementary Information in the original Article.

The changes do not affect the overall conclusions of the Article. These errors have now been corrected in the PDF and HTML versions of the Article, and in the Supplementary Information file that now accompanies the Article.
