Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-021-82013-w>, published online 29 January 2021

The original version of this Article contained an error in the value given for the bandwidth of a low-pass filter.

In the Methods section, subheading “Noise removal from the activity continuous”,

“To remove the activity continuous data derived from the EthoVision results, a low-pass filter with 0–1 Hz bandwidth is used (to remove the frequency).”

now reads:

“To remove the activity continuous data derived from the EthoVision results, a low-pass filter with 0–0.2 Hz bandwidth is used (to remove the frequency).”

The original Article has been corrected.
