Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-021-02117-1>, published online 23 November 2021

The original version of this Article contained errors.

In Table 2, subheadings “Alpha. Formula”, “Sigma. Formula” and “Beta. Formula” were incorrectly given as “Theta. Formula”.

Incorrect:

Theta. Formula: $\alpha \sim s(\text{age}) + s(\text{weight}) + \text{ti}(\text{age}, \text{weight})$				
Parametric coefficients	Estimate	SE	<i>t</i>	<i>p</i>
Intercept	0.587	0.048	12.13	< 0.001
Theta. Formula: $\alpha \sim s(\text{age}) + s(\text{weight}) + \text{ti}(\text{age}, \text{weight})$				
Parametric coefficients	Estimate	SE	<i>t</i>	<i>p</i>
Intercept	− 0.278	0.064	− 4.345	< 0.001
Theta. Formula: $\beta \sim s(\text{age}) + s(\text{weight}) + \text{ti}(\text{age}, \text{weight})$				
Parametric coefficients	Estimate	SE	<i>t</i>	<i>p</i>
Intercept	− 0.0379	0.079	− 0.477	0.635

Correct:

Alpha. Formula: $\alpha \sim s(\text{age}) + s(\text{weight}) + \text{ti}(\text{age}, \text{weight})$				
Parametric coefficients	Estimate	SE	<i>t</i>	<i>p</i>
Intercept	0.587	0.048	12.13	< 0.001
Sigma. Formula: $\sigma \sim s(\text{age}) + s(\text{weight}) + \text{ti}(\text{age}, \text{weight})$				
Parametric coefficients	Estimate	SE	<i>t</i>	<i>p</i>
Intercept	− 0.278	0.064	− 4.345	< 0.001
Beta. Formula: $\beta \sim s(\text{age}) + s(\text{weight}) + \text{ti}(\text{age}, \text{weight})$				
Parametric coefficients	Estimate	SE	<i>t</i>	<i>p</i>
Intercept	− 0.0379	0.079	− 0.477	0.635

Additionally, in the section “Future directions and limitations”,

“This is similar to humans, where neuromaturation continues well into “young adulthood”, with gray/white matter changes continuing beyond the age of 18⁷² and white matter developing into the late 1920s⁷³, despite the commonly accepted 18-year cutoff of adulthood^{72,73}.”

now reads:

“This is similar to humans, where neuromaturation continues well into “young adulthood”, with gray/white matter changes continuing beyond the age of 18⁷² and white matter developing into the late 20s⁷³, despite the commonly accepted 18-year cutoff of adulthood^{72,73}”

The original Article has been corrected.
