OPEN Author Correction: Experimental protection of quantum coherence by using a phase-tunable image drive

Published online: 18 March 2022

S. Bertaina, H. Vezin, H. De Raedt & I. Chiorescu

Correction to: Scientific Reports https://doi.org/10.1038/s41598-020-77047-5, published online 10 December 2020

The original version of this Article contained an error.

In the Results and discussion section, under the subheading 'Qubit dynamics',

"The general condition is $F_R = n\Delta$, $n \in N$ showing a comensurate motion of the qubit and h_i on the Bloch sphere."

now reads:

"The general condition is $F_R = n\Delta$, $n = 2k, k \in N$ showing a comensurate motion of the qubit and h_i on the Bloch sphere."

Furthermore, in the Supplementary Information file, in the Coherent pulses in rotating frame: Linear Rabi drive and circularly polarized Qubit protection section, under the subheading 'Shirley-Floquet formalism', Equations S18–S21 and surrounding text contained errors. The original Supplementary Information file is provided below.

The original Article and accompanying Supplementary Information file have been corrected.
