OPEN Author Correction: A novel soluble epoxide hydrolase vaccine protects murine cardiac muscle against myocardial infarction

Takahiro Kitsuka, Aya Shiraki, Jun-ichi Oyama, Hironori Nakagami, Atsushi Tanaka & Koichi Node

Correction to: Scientific Reports https://doi.org/10.1038/s41598-022-10641-x, Published on 28 April 2022

The original version of this Article contained errors in Figure 6 where the labels for the y-axis were incorrectly given in Japanese characters in Panels (b) and (c). The original Figure 6 and accompanying legend appear below.

The original Article has been corrected.

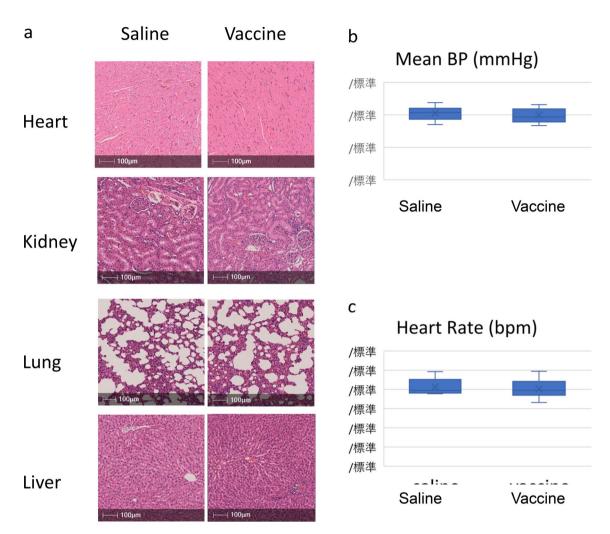

Figure 6. sEH vaccine was safely administrated in rats. (a) A representative photomicrograph of hematoxylin and eosin staining in heart, lung, kidney, and liver. Scale bars = $100 \mu m$. (b) The mean blood pressure at 11 weeks of age before MI induction. Saline group (n=10), vaccine group (n=11). (c) The mean heart rates at 11 weeks of age before MI induction. Saline group (n=10), vaccine group (n=11).
