Author Correction: Analogous response of temperate terrestrial exoplanets and Earth's climate dynamics to greenhouse gas supplement

Assaf Hochman , Thaddeus D. Komacek & Paolo De Luca

Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-023-38026-8>, published online 10 July 2023

The original version of this Article contained an error in Figure 5 (i) x-axis label.

“WS”

now reads:

“T”

The original Figure 5 and accompanying legend appear below.

The original Article has been corrected.

Published online: 18 September 2023

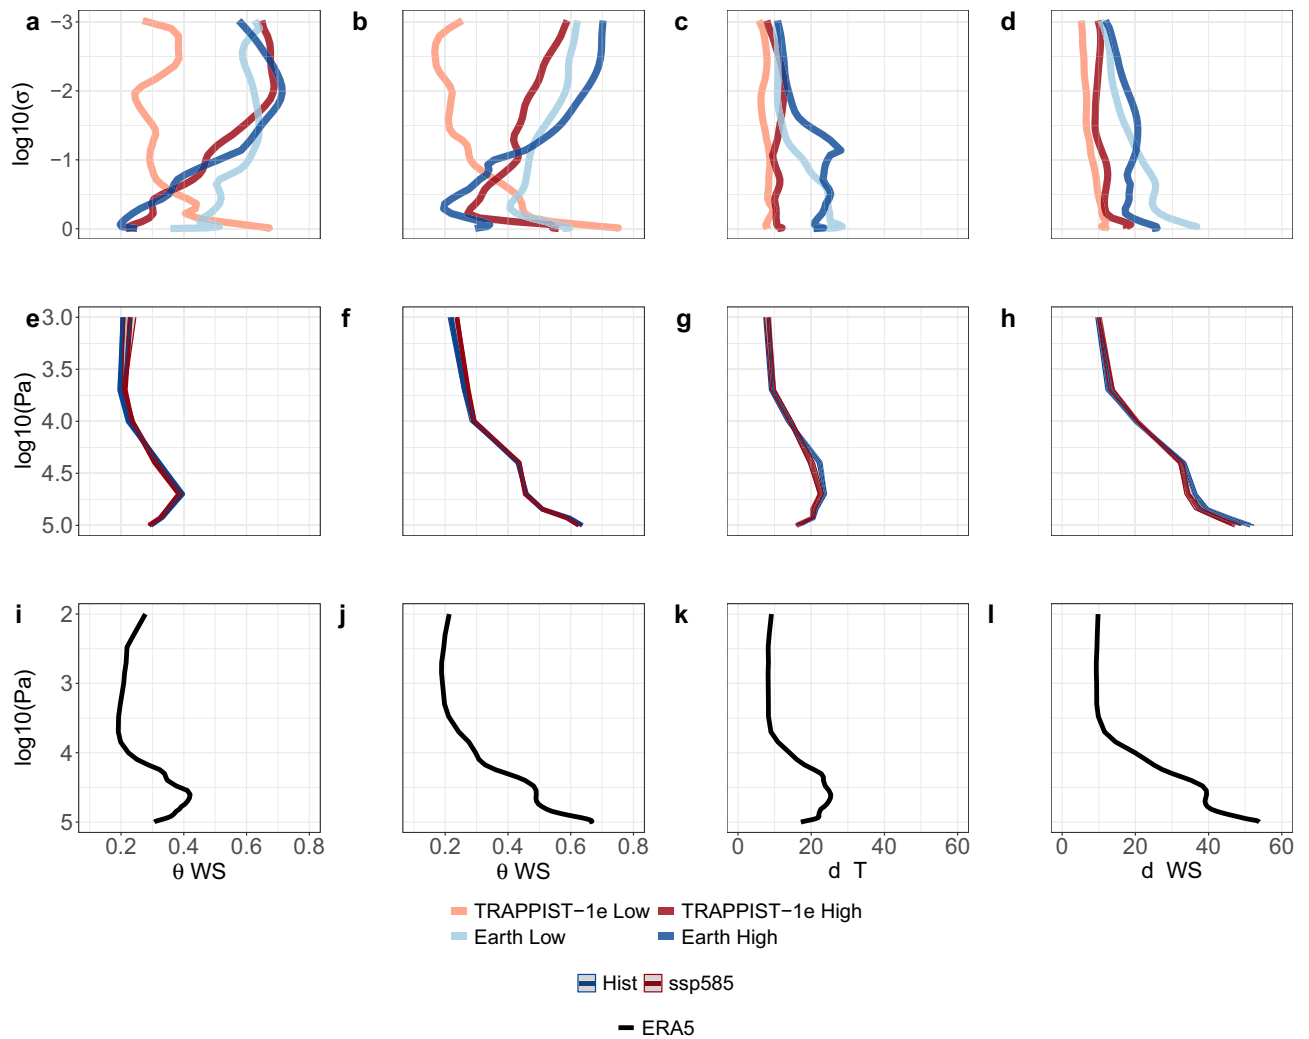

Figure 5. Global dynamical systems metrics vertical profiles for temperature (T) and wind speed (WS). (a–d) TRAPPIST-1e and Earth-like ExoCAM simulation averages under high and low pCO₂ scenarios. (e–h) CMIP6 multi-model ensemble medians for the historical (1981–2010) and SSP5-8.5 (2071–2100) periods. (i–l) Average of ERA5 reanalysis for the historical period (1981–2010). Dynamical systems metrics are local inverse persistence (θ) and local dimension (d ; see Methods).
