Correction: Impact of social determinants on COVID-19 infections: a comprehensive study from Saudi Arabia governorates

Abdallah S. A. Yaseen

Correction to: Humanities and Social Sciences Communications https://doi.org/10.1057/s41599-022-01208-2, published online 07 October 2022.

In the original version of this article, incomplete versions of tables 2 and 6 were inadvertently published. These have now been corrected in full in the HTML and PDF versions of the paper.

Original table 2

Table 2 Means of the study variables in KSA regions.

- Indicates rank of region value is >80% of all regions. 7 indicates rank of region value is >60% of all regions. indicates rank of region value is >40% of all regions. indicates rank of region value is >20% of all regions.
- . *OLD, INSURANCE and AV SALARY in each region are estimated by the average of all governorates in that region.

Amended Table 2

Table 2 Means of the study variables in KSA regions.
