Publisher Correction: The curious case of the test set AUROC

Michael Roberts ⓘ , Alon Hazan, Sören Dittmer ⓘ , James H. F. Rudd ⓘ &
Carola-Bibiane Schönlieb

In the version of the article initially published, in the "Single-dataset discrepancy scores" section, the sentence now reading "Samples that have $y = 1$ will be termed the positive class and those with $y = 0$ are the negative class" previously read "…with $y = 1$ are the negative class." Additionally, in the caption to Fig. 2 the descriptions of panels a and b and callouts in the text were swapped. These errors have now been corrected in the HTML and PDF versions of the article.
