In the version of this article initially published, the description of the proteomic analysis was incorrectly termed reverse phase protein array (RPPA) instead of liquid chromatography–mass spectrometry/mass spectrometry (LC-MS/MS). The Figure 3d schematic and Figure 3d,e legends as well as the Extended Data Figure 3 legend have been updated, and the Results section “The IL-17-associated cellular microenvironment in dual ICI” and Methods section “In vivo studies” have been corrected accordingly. The error does not affect the results or conclusions of this article, and we apologize for any confusion this may have caused.
