OBITUARY

It is with great regret we announce the unfortunate death at the age of 45 of Dr. G. J. Couvee a member of the Society.

Dr. Couvee obtained his degree in Utrecht, Holland and worked from 1956 to 1957 in Enschede and then went to New Guinea where he remained until 1960 as a doctor for tropical diseases. After his return to Holland he worked in several hospitals but from 1964 to 1971 he worked at the Rehabilitation Centre 'Hoogstraat'. Then from 1971 until 1973 he worked at the Antonius hospital in Utrecht. During the war he was a prisoner in a Japanese camp for three years.

He was always a good sportsman, keen at swimming, tennis and rowing. In April 1973, after a boat race on the River Rhine, he fainted and died from heart attack, while in the boat.

Dr. Couvee was a keen member of our Society and only two years ago he wrote an interesting paper on Para-Articular Ossification. The Society has expressed its sympathy to his widow.

SIR LUDWIG GUTTMANN
