CONFERENCE PROGRAMMES FOR THE ENTIRE DENTAL TEAM

The Dentistry Show, which takes place 19-20 March 2010 at the NEC Birmingham (www.thedentistryshow.co.uk), offers six different programmes to choose between. Whether you are a dentist, nurse, hygienist, therapist, practice manager, technician or another member of the team, there is plenty for you to listen to, learn and to take home.

Delegates can view, close up, a fully

functional 'Live Theatre', which will feature leading clinicians performing a number of procedures ranging from implant surgery to whitening and botulinum toxin use. There will be workshops on how to carry out whitening safely and achieving success in cosmetic dentistry. You can also register for free and gain up to 15 hours of CPD at the show.

IT MAINTENANCE PLANS

Micro Minder is a supplier of IT hardware for dental practices, and supports over 1,800 dental practices in the UK with their IT maintenance plans. A maintenance plan by Micro Minder can fix your overheads for the year and ensure no unexpected bills in the event of your computer system failing.

Working on an annual plan or a pay

as you go basis, the company can fix any problem quickly and easily, regardless of the systems in place, leaving the practice to focus on patient care.

With three times as many engineers employed by Micro Minder as their closest rival and operating throughout the UK and Ireland, you can be assured of the ultimate in both product and service.

IMPROVE YOUR ENDODONTIC SKILLS

Henry Schein Minerva have introduced the 'Twisted File: Innovation in Endodontics' course for 2010. This hands-on course is designed for the general practitioner to improve their daily endodontic skills.

Areas covered will include diagnosis, case selection, the latest endodontic instrumentation and the cleansing, shaping and packing of the root canal system in three dimensions with warm obturation techniques and bonded obturation.

On completion, delegates should have a comprehensive understanding of key learning objectives such as case selection, key elements of shaping root canals, for shaping and filling and the importance of a three dimensional fill.

IMPLANT GUIDANCE

The Implant Education Centre, based in Leicester, in conjunction with Nobel Biocare runs a one year dental implant training programme designed for dentists with a basic knowledge of implants who want guidance through simple and safe implant treatments.

The course also offers support on more complex and advanced cases. GDC registered delegates will benefit from the many highlights of this programme including 138 CPD hours, 12 modules over 12 months and 15 days training, 60% hands-on live surgery and 40% theory, a three day, hands-on, cadaver

module in Washington DC, mentoring and support during the programme plus four free sessions in the following 12 months and a state of the art Implant Training Centre with CT Scanner, five surgeries and onsite lab for practical work. The course is lead by Chris Lucas BDS and a 26 strong training team.
