

## SUPREMELY EFFECTIVE CLOTHS

Evident's range of re-usable, washable microfibre cloths, 'e-cloth Professional', contain antibacterial nano silver and clean so effectively that there is nowhere left for bacteria to grow, removing grease, dirt and bacteria from hard surfaces without the need for harsh, needlessly expensive cleaning products.

HTM 01-05 section 6.58 details Department of Health-sponsored research on the use of microfibre cloths suggesting that, provided deep cleaning

is performed as an initial exercise, the subsequent use of microfibre-based techniques can be helpful in achieving satisfactory removal of infectious agents from surfaces. Additionally it states, 'The patient treatment areas should be cleaned after every session using disposable cloths or clean microfibre materials'.

Following National Patient Safety Agency guidelines e-cloth Professional cloths are available in packs of ten in green, blue, red or yellow.

## ACHIEVE A HIGH LUSTRE

Being disposable, One Gloss polishers are the perfect adjunct to your cross infection procedures.

These unique one-step polishers can be used to finish and polish all composite restorations simply by altering the contact pressure on the restoration, without having to change instrument. To achieve a high lustre finish to your composite restorations simply apply pressure to the instrument and during the polishing process gradually reduce the pressure for an unrivalled glossy finish.

One Gloss polishers are extremely useful for removing surface stains as well as excess resin cement from tooth surfaces without causing any damage to the enamel. These polishers have proved to be particularly useful in orthodontic cases and polishing after scaling. By using One Gloss before tooth whitening treatments chairside time is greatly reduced.

One Gloss is packaged in a set of 60 polishers (20 each of Cup, Midi Point and Inverted Cone shapes) and 3 x CA Mandrels plus instructions.

## INTELLIGENT ULTRASONIC DEVICE

With PerioScan, Sirona is offering an intelligent ultrasonic device that supports the task of root planing and scaling, combining diagnosis and therapy at the same time: subgingival calculus can be detected and removed quickly and precisely without changing instruments. An additional advantage of PerioScan is the gentle and painless treatment due to the controlled linear vibrations of the ultrasonic tip.

Effective bacteria management is crucial, ensuring the long term success of the periodontal treatment. Both the SIROLaser Advance and its little brother, the basic model SIROLaser Xtend, reduce germs in the affected gingival pockets, ensuring a sustained improvement in periodontal treatments. The diode laser is intuitively operated and easy to configure to the user's requirement thanks to its

intelligent software with self-explanatory menu navigation and practical colour touchscreen.

With its high quality handpieces and contra-angles as well as ultrasonic instruments and air scalers, Sirona supports dental technical staff in the areas of diagnosis, cleaning, treatment and polishing. Suitable instruments are available for all cleaning and polishing services and all prophylaxis instruments from Sirona are ready for use in seconds after their easy connection.

## IMPLANT CALENDAR HIGHLIGHT

The International Team for Implantology (ITI) is a unique network that unites professionals around the world from every field of implant dentistry and related tissue regeneration. As an independent academic association, it actively promotes networking and exchange among its membership.

This year's Congress will take place in Liverpool on 1-3 December with the theme 'Implants in Practice'. The programme is aimed at dentists in general practice and their team of technicians, clinical dental technicians (CDTs) and

other dental care professionals (DCPs). With an estimated 700 delegates the ITI Congress UK & Ireland in Liverpool will be the highlight of the dental implant calendar in 2011.

The two main Congress days are divided into four sessions: Marketing, Implant Surgery, Implant Prosthodontics and Digital Dentistry with parallel sessions for technicians, CDTs and DCPs and an exciting list of speakers. There is also a pre-Congress day with the famous clinical duo of Professors Danny Buser and Urs Belser.
