

New products and focus on infection control and surgery design

SEMINARS ALL SET FOR 2012

GlaxoSmithKline Consumer Healthcare (GSK) has announced that the online application process for Talking Points in Dentistry 2012 is now open.

Now in its 27th year the educational programme is open to all members of the dental practice team and is free to attend. The two speakers will be announced shortly and as usual will cover both clinical and practice based topics.

The evening events will be held at nine venues across Great Britain during May, visiting Southampton, Watford, London, Falkirk, Newcastle, Bolton, Bristol, Solihull and Leeds. Attendance at the evening seminars can also

count towards your CPD allowance.

Tickets can be reserved at www.gsk-dentalprofessionals.co.uk where full details of the events and lectures will also be available.

RESTORE PATIENT SEATING TO ITS FORMER GLORY

Specialist seating manufacturers Meditelle-Dental are now offering dental practices an onsite service to reupholster your patient seating.

Whatever the type or brand of patient chair you have, and whatever its condition, Meditelle can restore it to its former glory. Their expert upholsterers use the highest standards of traditional skills backed by the latest technology to carry out a full onsite re-upholstery of your dental equipment.

Meditelle's onsite re-covering service ensures that your equipment will not be out of service for any length of time with all processes carried out in the practice with minimal fuss.

Ensuring the safety of your equipment such as patient chairs or even operator chairs is vital. Re-upholstering may be all that is required if you have any scratch marks or slits in your chair vinyl covering that present an infection control hazard. Treating this quickly and efficiently with Meditelle's re-covering service limits the chances of infections and keeps your equipment safe and hygienic.

DEDICATED TO YOUR EQUIPMENT

Dedicated to delivering expertise in every aspect of surgery layout and installation, Henry Schein Minerva's Equipment division use the latest CAD technology to produce bespoke scaled layouts, plans and accurate service drawings, to ensure you achieve the best possible surgery design in the space available.

Being fully familiar with all your practice's equipment and special requirements, Henry Schein Minerva's manufacturer-trained techni-

cians can offer the support you need by providing maintenance certification for your dental equipment. To ensure optimal performance of all your capital equipment, digital imaging, laser and CAD/CAM solutions, Henry Schein Minerva can deliver a full care and maintenance programme combined with a personalised, local service.

Henry Schein Minerva will take the time to install and fully train you on your new equipment so you feel confident in daily practice.

GLOVES WITH ALOE VERA

The Dental Directory now stock UnoDent Nitrile Gloves with aloe vera.

These latex-free, ambidextrous gloves are perfect for the busy dental professional seeking a product that is

both highly effective and helps protect cracked or chapped hands.

Each glove is specially coated with aloe vera – a substance renowned for its soothing, anti-inflammatory properties, and cooling, moisturising effect.

UnoDent Nitrile Aloe Vera Gloves come in boxes of 100 and in a range of sizes. These gloves have been manufactured and tested to standard EN 455 (Parts 1 and 2).
