

New products and focus on restoratives and cosmetic dentistry

Please send product news information and images to Kate Maynard at the *BDJ*, Nature Publishing Group, The Macmillan Building, 4–6 Crinan Street, London N1 9XW.

Product news is provided as a service to readers using text and images from the manufacturer, supplier or distributor and does not imply endorsement by the *BDJ*. Normal and prudent research should be exercised before purchase or use of any product mentioned.

FIRST WHITENING MOUTHWASH

MyOralHealth has launched what it claims to be the UK's first legal whitening mouthwash. With a 2% hydrogen peroxide base, the mouthwash is sugar and alcohol-free and contains fluoride. It not only gently whitens teeth, but also kills germs that cause bad breath, reduces plaque and protects against cavities and gum disease.

The whitening mouthwash can be personalised to any practice and is the perfect adjunct to promoting your practice on an oral hygiene and whitening footing.

Customers will receive a free personalised waiting room poster with their first order.

TOOTH-LIKE FLUORESCENCE

LuxaFlow Star, from DMG UK, is the natural successor to LuxaFlow-Fluorescence.

LuxaFlow Star is a flowable light-cured composite specifically designed as an add-on resin for DMG's internationally successful temporary crown and bridge material Luxatemp Star (eg for colour individualisation or repairing). It can also be used as a conventional flowable filling material in small class III, IV and V restorations, minimally invasive restorations and linings. With tooth-like fluorescence, it means that temporaries and restorations now look more lifelike than ever, under all lighting conditions.

Supplied in 1.5 g syringes, it is applied via fine tips directly *in situ* to help minimise waste. Available in five shades, including A3, LuxaFlow Star is non-slumping, extremely polishable and radiopaque. It is available in an all-inclusive Introductory Kit. Refill Packs of two syringes and ten tips are available separately.

CLEVER CURING LIGHT

For a smarter, more controlled curing light, practices should look no further than the Dr's Light Clever Cordless Curing Light, available exclusively from The Dental Directory.

The Dr's Light Clever Cordless Curing Light allows users to focus

the curing light through a special lens in the guide-cap for enhanced light quality. This focused light has high permeability and makes for deep polymerisation and optimum curing.

As well as offering superb curing performance, the Dr's Light Clever Cordless Curing Light also features an ergonomic, friendly design and the ability to choose from one of four curing programmes including High, Low, Soft Start and Pulse Mode, which are selectable from the product's easy-to-read OLED display.

Each Dr's Light Clever Curing Light set comes complete with handpiece, charger, 3 × autoclavable guide caps, adaptor, power cable and an interchangeable battery pack. For added peace of mind the product also comes with a 1 year warranty.
