

### A SUPER HERO COMPOSITE

Exclusive rewards can easily be gained by simply visiting GC UK's Facebook page. *The Adventures of everX* is an e-comic that shows how everX can save you money in your practice and that in certain cases can replace more complex treatment plans due to its high strengths.

GC everX Posterior is a fibre-reinforced composite designed to be used as dentine replacement, in conjunction with a conventional composite such as G-ænial Posterior used as enamel replacement. The short fibres of GC everX Posterior will make it a perfect sub-structure to reinforce any composite restoration in

large cavities. Fibres will also prevent and stop crack propagation, which is considered to be the main cause of composite failures. GC everX Posterior opens new possibilities for restorations of extensive cavities at chairside.

On GC's Facebook page you'll find lots of information including GC's Restorative Dentistry Guides for dental clinicians and GC's Initial Layering Guide for dental technicians. You'll also be able to claim free samples from time to time, just by simply clicking the icon on GC's page.

For further information visit Facebook or contact GC UK on 01908 218 999.

### ROTARY ENDODONTIC TRAINING

Integrated Dental Holdings (IDH) is offering a new course through The IDH Academy, providing practical training in the use of rotary endodontic files. The course aims to bring IDH dentists up to speed on the new endodontic file system, which will allow for cutting-edge root treatments with improved accuracy and speed.

The new rotary file, manufactured and provided by Sendoline, has simple cable-charge technology and a compact, easy-to-use design. The training offered by The IDH Academy will allow dentists to carry out treatments on patients within the surgery, reducing costly referrals to specialists.

The one-day, hands-on course has already been undertaken by over 200 IDH dentists across the country at a reduced rate. In 2014 the course will also be made available for external dentists. It offers quick, comprehensive training and provides up-to-date industry knowledge and the opportunity to develop and improve endodontic treatment.

The IDH Academy aims to teach dentists the skills that help them provide the best care for patients. The rotary endo training is another example of IDH's continued efforts to produce industry-leading dentists with a passion for technological developments that heighten the patient experience.

Find out more about the Academy and training in rotary endodontics at the following websites: <http://idhacademy.co.uk/> and [www.sendoline.com/](http://www.sendoline.com/).

### EASIER THAN EVER TO NAVIGATE

Oral healthcare expert Curaprox has launched a brand new UK website to enhance the display of its wide range of products and to continue providing specialist advice.

The Curaprox website is now easier to navigate than ever before, making it simpler for you and your patients to locate items and information. New to the website are informative guides on, for example, how to use manual brushes correctly and tips for using interdental brushes, which provide excellent oral healthcare guidance.

Also included on the newly refined website

are videos for each individual product, so you can show your patients exactly how to use a specific toothbrush or interdental brush correctly.

A new downloadable brochure and online shop also makes purchasing Curaprox products such as the Curasept ADS range or the CPS Prime range of interdental toothbrushes more straightforward.

Call 01480 862084 or visit [www.curaprox.co.uk](http://www.curaprox.co.uk).

### BECOME A MASTER OF ENDODONTICS

Whether you want to enhance the patient service you provide, help your dental practice grow, or just become a better clinician, Healthcare Learning: Smile-on has a solution for you.

The latest qualification available from the education provider is an MSc in Endodontics. Designed as a two-year, part-time blended learning course, tuition is delivered through a combination of webinars, face-to-face instruction and hands-on sessions, with vast online resources accessible to students throughout.

Taking you from the science behind modern techniques, to the clinical implications, research methods and practical guidance, the course covers all aspects of endodontic treatment. Ongoing support is also available over the two years, offering additional advice and guidance when you need it.

To apply, all you need is two years' experience in general practice, professional or academic references, and access to your own patients for case studies in three of the units.

For your chance to develop your skills and better yourself and your dental practice, find out more from Healthcare Learning: Smile-on.

Applications are now being accepted for courses starting in 2014. For more information or to apply, call 020 7800 8989 or email [info@healthcare-learning.com](mailto:info@healthcare-learning.com).
