Product news is provided as a service to readers using text and images from the manufacturer, supplier or distributor and does not imply endorsement by the *BDJ*. Normal and prudent research should be exercised before purchase or use of any product mentioned.

CURING LIGHT WARNING

Kerr is highlighting a warning issued by the Medicines and Healthcare products Regulatory Agency (MHRA), asking UK dentists to check if they have bought counterfeit and unapproved dental curing light devices after 261 products were sold by people on eBay.

The MHRA states: 'The products sold on eBay have not been tested for safety or that they work. Whilst the health risk remains low, people treated with them at dental practices could experience pain through tooth decay and may require additional treatment.'

'Dentists who have bought these products are urged to dispose of them following appropriate clinical procedures.'

'They can identify them by:

- No instructions for use
- On the genuine devices the Woodpecker mark is at the top; this is not on the counterfeit ones
- The electrical plug supplied is of poor quality.'

Committed to excellence, Kerr would like to reassure its customers that all of its dental curing light devices meet all relevant regulations.

For further information on Kerr's range of curing lights, visit www.kerrdental.co.uk, email kerruk@kerrhawe.com or call 01733 892292.

SMELL FRESH UNDER THE MISTLETOE

Following an independent research study, Periproducts is proud to announce that its highly recommended alcohol-free Daily Oral Rinse, from the award winning UltraDEX Performance Oral Care Range, is now clinically proven to eliminate bad breath for at least 12 hours. The unique iQ+ ActiveOxi Technology with Stabilised Chlorine Dioxide instantly

destroys the volatile sulphur compounds (VSCs) in the mouth and neutralises odour-causing bacteria to leave users with long lasting fresh breath confidence.

UltraDEX Daily Oral Rinse eliminates, not masks bad breath. It is clear and unflavoured and comes with an optional mint flavour sachet for personal preference. The same clinically proven technology can be found in all the other UltraDEX oral care products. It doesn't stop there: the clinically proven technology also gently whitens teeth by oxidising organic stains such as tea, coffee, tobacco and red wine and helps to prevent tooth decay, gum problems and plaque, making it the perfect product for people with busy lives.

All UltraDEX products are approved by the Vegetarian Society, registered with the Vegan Society and are alcohol-, SLS- and gluten-free. The UltraDEX Performance Oral Care range bridges the gap between professional and at home dental care, providing a superior level of cleaning and protection. For further information visit www.periproducts.co.uk or email dental@periproducts.co.uk.

NO WAITING, NO MIX-UPS, NO DELAYS

For a faster, smarter intraoral imaging plate system that retains the familiarity of film, choose the CS 7600 by Carestream Dental. Fully automated and featuring unique 'Scan & Go' technology, the system ensures a smoother and more secure X-ray workflow, effortlessly.

Premium quality images can be viewed in just five seconds and the smart plates are embedded with patient data, ensuring X-rays are always correctly identified. The plates can be scanned in any order and images are automatically sent to the appropriate patient file on the practice PC.

As easy to use as film, but producing superior quality images, the CS 7600 integrates quickly into the practice, while the compact unit is suitable for all configurations, even practices where space is at a premium.

With no waiting, no mix-ups and no delays, moving from film to digital couldn't be simpler with the CS 7600.

For more information, contact Carestream Dental on 0800 169 9692 or visit www.carestream-dental.co.uk.
