

CONFERENCE WILL LOOK AT FUTURE OF DENTISTRY

On 29 October 2014 Government Knowledge is holding an event called 'The future of dentistry and oral health in England' at Arlington Conference Centre in Camden, London.

From April 2013 the NHS Commissioning Board has been responsible for commissioning NHS dental services. Ensuring that dental services are equitable and accessible is essential in building good oral health, whether they are NHS or private dental services.

This informative policy-led event will take an in-depth look at the changes to NHS dental services as well as looking at the whole of the dental industry.

Key issues to be discussed include:

- Securing excellence in commissioning NHS dental services
- Creating high quality pathways for dentistry with a focus on outcomes
- Creating rewarding careers for clinicians
- Building public confidence in dental regulation
- Local Professional Networks
- The Dental Contract Pilots
- Innovations in dental treatment and technology
- Improving the oral health of children.

IDEAL INTRODUCTORY LASER

Quicklase have released the new 3w laser that is ideal as an introductory laser and priced at only £2,495 including VAT and delivery. The 3w laser can be used for day to day dentistry for basic procedures such as troughing for accurate impressions and gingival re-contouring for better fitting veneers and crowns. It can also be used for gingivectomy, gingivoplasty and implant recovery.

The laser is also available as a 4w and 8w model as well as an 8w dual, which has an 810 nm and 910 nm wavelength.

In addition to soft tissue the Dentalase lasers can also be used for teeth whitening and TMJ, and come with therapy and whitening attachments at no extra cost.

Quicklase are the only British manufacturer of soft tissue lasers providing you with local backup and support. This also means that they can offer the Dentalase lasers at very competitive prices, making it affordable for your surgery to offer laser assisted dentistry and in turn making your practice more profitable.

Quicklase have also released endo products, which include K-Files, hand files, gutta percha, rotary files and paper point. Visit www.quicklase.com/product/endo/ for more information on endo products. www.quicklase.com

PROVIDE EFFECTIVE AFTERCARE TO YOUR PATIENTS

Tandex provide quality Orthodontic Kits to help aid your patients' aftercare following treatment.

An effective way to ensure that patients maintain efficient oral healthcare after a dental procedure is complete is to offer a fully prepared kit that contains all of the necessary tools.

The Tandex Orthodontic Kit has a selection of adjuncts ranging from an Advance Medium toothbrush to eliminate bacteria from around the oral cavity, to the SOLO Medium brush for precise interdental cleaning. It also comes with four FLEXI Lime interdental brushes with non-slip flexible grip for pleasant and versatile maintenance.

The kit includes a detailed user guide that comprehensively instructs patients on optimum

cleaning protocols. Produced in cooperation with dentists and hygienists the in-depth information allows patients to use the products as they were intended, for easily achievable and excellent results.

Tandex Orthodontic Kits offer your patients the highest quality tools and direction for effective aftercare. Contact the team at Tandex today to find out more. www.tandex.dk
