INTERFACE BETWEEN DEMENTIA AND ORAL HEALTH

The state of oral health can be one of the indicators of dementia. Dementia is a progressive condition and it is important to establish a dental care programme at, or soon after, a diagnosis. Maintaining oral health brings benefits in terms of self-esteem, dignity, social integration and nutrition. FGDP(UK) is organising a one-day seminar at the Royal College of Surgeons of England on Friday 2 October 2015, to examine and discuss the link between dementia and oral health.

Whether you work in a care home environment with a duty to ensure that residents' healthcare needs are met, or you work in a dental practice and need to understand more on treatment consent and dementia, this will be an eye-opening and informative event. A host of prominent figures from a range of organisations, influential in the world of dementia and oral health research, will be speaking on this topical issue.

For more information on the event programme visit www.fgdp.org.uk/event/fgdp-event/interface-between-dementia-and-oral-health.ashx, or to reserve a place, email the FGDP(UK) Research Officer, Amrita Narain at ANarain@rcseng.ac.uk or by calling 020 7869 6750.

A LEADING EDUCATIONAL PROVIDER

Healthcare Learning is a leading education provider, offering support for dental professionals from their undergraduate and postgraduate studies, right up to their continued professional and career development.

Working with some of the world's leading institutions, Healthcare Learning offers a range of innovative solutions in online and blended learning, all designed to be studied at a pace that easily fits in with the busy lives of dental professionals.

They offer the UK's first online postgraduate MBA specifically designed for a healthcare setting, with the MBA Healthcare in association with Plymouth University.

The MSc in Restorative and Aesthetic Dentistry is an innovative, technology driven, blended learning programme that brings top-class international faculty together in a modern and global classroom.

Also, the ILM Level 4 Certificate in Principles of Leadership and Management offers professionals vital training in the key non-clinical aspects of running a practice, including staff management, marketing and budgetary control.

To learn more call 020 7400 8989 or email info@healthcare-learning.com.

A WINNING SYSTEM FOR ALL DENTISTS

Few patients enjoy having impressions taken, but they do want accurate, highly aesthetic restorations. With the option of having a restoration created and fitted in a single appointment, CEREC Omnicam is a winning system suitable for all dentists.

Capable of scanning the entire mouth, CEREC Omnicam features a slimline design and compact camera tip. This offers easy handling and more comfortable scanning of both anterior and posterior teeth. The scan can be viewed within a matter of minutes, on screen in a true to life, full colour 3D model.

CEREC Omnicam takes digital impressions, which can be instantly transmitted to your dental laboratory or milling unit for in-surgery restoration milling.

Henry Schein Dental has a team of experienced CEREC specialists who are happy to assist you with the move to a digital workflow, whether that's chairside or laboratory based.
