JOIN A DENTAL CRUISE ON THE DANUBE

Join Jon Baines Tours on their dental cruise along the stunning Danube from 23 September – 1 October 2015. Watch centuries of civilisation and stunning landscapes unfold before your eyes as you drift along the Danube aboard the elegant Amadeus Royal. Enjoy the riches of culture, Gothic and Baroque architecture and spectacular river, lake and mountain scenery. This is Europe at its most magnificent and you will experience its sophistication, culture and charm first hand.

Led by Professor Phillip Dowell this dental cruise includes a number of CPD lectures and onshore dental visits, as well as a full partner programme and a cultural itinerary that makes the most of your time amongst the Danube cities and towns. The cruise includes a sumptuous final night at the luxury Corinthia Hotel in Budapest with a farewell dinner. There is also an

optional pre-cruise extension to Prague and a post-cruise extension to Transylvania.

Cabin rates start at £1,604 with the cost of the optional pre- and post-extensions being £398 and £668 respectively.

Further information including a full brochure and itinerary can be found at www.jonbainestours.co.uk/danube; or you can call 020 7223 9485 or email info@jonbainestours.co.uk.

PROVIDING THE SUPPORT THAT YOUR PRACTICE NEEDS TO GO DIGITAL

Connect Dental from Henry Schein digitises the process of restoring teeth in dental practices and laboratories.

Connect Dental solutions include 3D diagnostic scans, practice management software, intraoral scanning, data transfer from practice to laboratory, design software for implant dentistry and/or the final restoration, milling of implant guides and abutments, the final restoration and the materials required for placement.

The process of going digital can be complex and feel overwhelming for dentists and technicians. Henry Schein has created Connect Dental with that in mind, so that all dental professionals can feel confident in offering modern care to their patients. Henry Schein Dental is the only company in the world who can help dentists assess their individual needs and then customise a solution, offering a 'best in class' product offering to support those needs.

Henry Schein is building a world-class education system and user community to make sure that each customer has the opportunity to fully embrace digitisation. They are also able to service and maintain any and all of the technologies and equipment. In short, Henry Schein Dental streamlines and integrates digital processes, making everything work together to provide practices and laboratories with a digital platform that enhances patient outcomes.

THE MOST TOOTHLIKE RESTORATIVE

GrandioSO, the universal nano hybrid restorative for all classes of cavity, is suitable for Class I to V restorations, reconstruction of traumatically injured anterior teeth, interlocking and splinting of loosened teeth, corrections of shape and shade to enhance appearance, core build-up for crowns, and the fabrication of composite inlays.

GrandioSO stands out due to its superb material properties and is the most toothlike material in the sum of its physical parameters. This composite allows for equally durable and aesthetic restorations, due to very high filler content and low shrinkage, high compressive and flexural strength, an

E-modulus and thermal expansion behaviour similar to dentine, very high surface hardness, low abrasion as well as the optimal balance of translucence and opacity. Sixteen different shades cover the entire spectrum relevant to dentistry.

GrandioSO also convinces through its optimal handling properties. Due to its smooth consistency, this material is

readily packable and possesses good sculptability without having the tendency to stick to the instrument. www.voco.com
