

THE FIRST PURELY CERAMIC-BASED UNIVERSAL RESTORATIVE MATERIAL

At this year's BDIA Showcase Admira Fusion are proud to introduce the world's first purely ceramic-based universal restorative material. Silicon oxide forms the chemical base for this new nanohybrid ORMOCER restorative material, not only for the fillers but also for the resin matrix. This offers several remarkable advantages: Admira Fusion, in comparison with all restorative composites of market relevance, shows by far the lowest level of polymerisation shrinkage and extremely low shrinkage stress.

The ORMOCER's used in the manufacture of Admira Fusion make it highly biocompatible, as there is no content of classic monomers. Admira Fusion has an 84% (by weight) content of inorganic fillers and covers a broad spectrum of indications. Admira Fusion's particularly high colour stability gives it an additional edge. This very homogeneous material offers outstanding handling and is compatible with all conventional bonding materials.

Admira Fusion and Admira Fusion x-tra are available in syringes and also caps for direct application. The Admira Fusion set, optionally containing syringes or Caps, is still available at an introductory price giving you 30% discount. And for purchases of four syringes, or four packs of 15 Caps, via a VOCO dental consultant VOCO will supply one extra pack free of charge.

For further information visit stand M135 or www.voco.com.

STAY SAFE CLEANCERT

Quick and simple to use, cost-effective and proven to be 100% effectual, CleanCert products have not only been endorsed by the NHS for over a decade, but have consistently been shown to be a safer, easier and cheaper way to protect your dental practice.

At the BDIA Dental Showcase 2015, the team from disinfection experts CleanCert will be on stand O65 to explain how their products will benefit your practice.

We are all aware of the threats biofilms and dangerous pathogens pose to healthcare environments and as dental professionals you are responsible and accountable for reducing the risk of contamination. CleanCert offers affordable, proven and CE certified products that you can rely on to keep your patients and your dental team safe from infection.

Providing dental professionals with a number of 'best in class' water purification and disinfectant products, CleanCert also offers a dedicated water-testing and equipment disinfection service that will ensure your practice always complies with crucial HTM 01-05 and Health and Safety Executive (HSE) regulations.

For more information be sure to visit the CleanCert team on stand O65 at this year's BDIA Dental Showcase.

INTRODUCING LISA

W&H look forward to welcoming you on Stand G115 at BDIA Dental Showcase for the latest news and special offers on handpieces, surgical and decontamination products with options available to suit individual budgets and requirements. W&H is pleased to launch the all new Lisa vacuum B steriliser which is even more intuitive and easier to use, thanks to a new user interface and user orientated menu. Lisa is now faster than ever, offering the fastest B cycle for average loads and will increase the life of your handpieces thanks to its enhanced 'ECO dry' system. Lisa is synonymous with speed, efficiency and great value. Also being launched are the exciting new MS and Lina sterilisers offering improved cycle times, excellent ergonomics and great value. Information will be available on the full range of decontamination equipment including the ThermoKlenz washer disinfectant dryer.

W&H are delighted to be showing the Assistina range offering the most efficient concept in handpiece cleaning and lubrication. The Assistina 3X3 sets a new

standard in handpiece hygiene and maintenance being the ideal device for internal and external cleaning and lubrication of all handpieces.

W&H also offers an exciting range of surgical units and handpieces which will be on promotion at amazingly low prices, including the implanted surgical system which offers unbeatable precision, ease of use and reliability. Piezomed is the new force in bone surgery. This device from W&H puts all the advantages of innovative ultrasound technology at the surgeon's fingertips: high-frequency microvibrations allow cutting with incredible precision and the cavitation effect ensures an almost blood-free surgical site.

For more information visit W&H on Stand G115.

EVEN MORE ON SHOW AT THE SHOW!

Dürr Dental will have its largest stand ever at this year's Dental Showcase and will therefore be able to accommodate even more of its equipment. Experts will be on hand from all areas of their business to discuss the company's most recent advancements.

Dürr products are designed to make your working life easier. This is evident in the latest networking systems that can be used with your compressor and suction system. By

linking them to the network, practices can see the performance of each piece of equipment at a glance. Linking the compressor, for example, to the digital network yields numerous benefits: current status, faults or messages, such as for filter changes, are immediately displayed and can be seen with a glance on the monitor.

Durr's imaging products never fail to excite. Visitors will be able to see how VistaIntra, for example, works in perfect partnership with their image plate scanner, VistaScan. The former is modern and slim in design and is easy to operate and position. It is pre-programmed with exactly the right X-ray dose when using Durr Dental image plates and sensors. This ensures it's ready for use and always delivers clear, perfectly exposed images.

Visit K195 for more information.
