

NEW PRODUCTS AND FOCUS ON FINANCIAL SERVICES

Please send product news information and images to Kate Quinlan at the *BDJ*, Nature Publishing Group, The Macmillan Building, 4-6 Crinan Street, London, N1 9XW. Product news is provided as a service to readers using text and images from the manufacturer, supplier or distributor and does not imply endorsement by the *BDJ*. Normal and prudent research should be exercised before purchase or use of any product mentioned.

NO NEED FOR A SECOND TAKE

Dürr Dental's panoramic device is so easy to use you won't need a second take, as the first one will almost certainly be perfect. Unlike other devices this unit does not rely on experience or expertise; in fact both are almost negligible!

VistaPano works completely differently to conventional machines and employs S-Pan technology. This ensures the reconstruction is geared at the actual position of the bite thus obviating positional errors. The intuitive software selects only the sharpest images from the many segments taken in a single use.

TAKE CONTROL OF YOUR PRACTICE FINANCES

With over 20 years' experience, DPAS know dental plans inside out and offer an incomparable level of expertise and administration services to any practice looking to offer their patients a means of budgeting for their dental care.

Dental plans are not only good news for patients, they also make great financial sense for practice owners, providing a consistent revenue stream, improving cash flow and increasing patient loyalty.

DPAS Dental Plans has specialist teams who take care of data management, advise on fee reviews, help with practice marketing and deliver bespoke team training, all of which means we are always available

The unit is exceptionally versatile. In addition to the standard panorama programs, dentists can use options for right, left, and front half-side images and functions for orthogonal bitewing images, mandibular joint images for function diagnostics, and para-nasal sinus images.

Radiation safety is also optimised. The VistaPano S can take a panoramic image in just seven seconds meaning patients are exposed to the lowest possible radiation dose. The equipment is also highly intuitive and adapts the dosage according to which of the 17 different programmes is selected.

VistaPano S can be used with any imaging package so that all staff members can access the data from their workstations. Using the image files on an iPad can also be achieved with help from the Dürr Dental Imaging app.

to make sure you get the comprehensive support you deserve.

Whether you are launching a plan, transferring from another provider, looking to re-invigorate an existing dental plan or considering converting from the NHS, DPAS provide everything you need to put you in control of your business finances and help your practice grow.

For more information on DPAS's flexible, comprehensive and effective dental plans, contact DPAS Dental Plans on 01747 870910 or email enquiries@dpas.co.uk.
