

## Why take two uniforms to the practice?

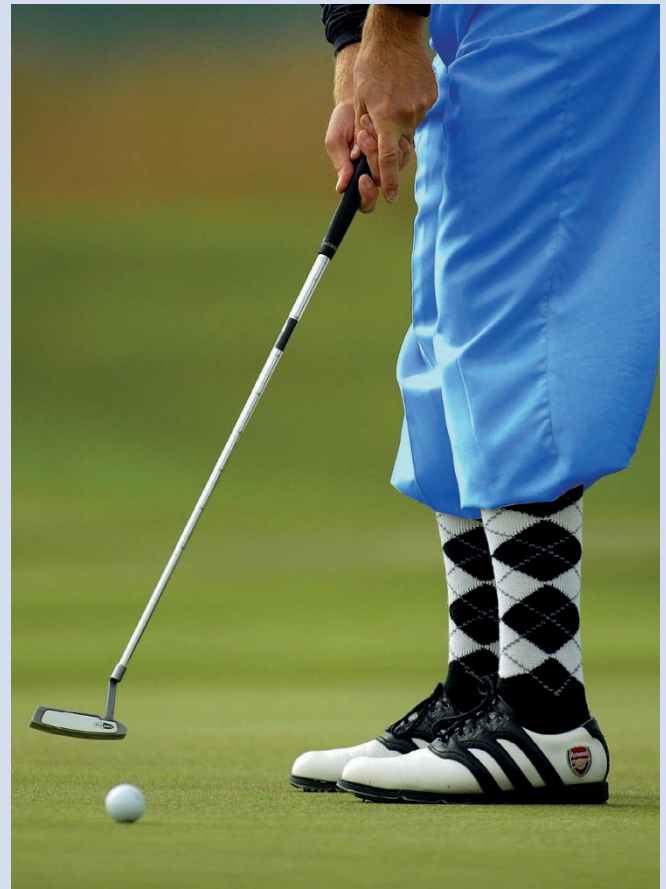

Leading supplier of healthcare uniforms Sound Scrubs has introduced an innovative new outfit for busy dentists that combines functional scrubs with golf attire that would pass the strictest of golf club dress codes.

The Eagle 2in1 Teeth-off 1000 consists of a polo shirt with adjustable sleeves and detachable collar and a wipe-clean coating for easy removal of blood or spittle, and tailored trousers made from the same material that zip off at the knee for golf games in warmer weather. For the more traditional or eccentric golfer who has spent the whole morning at the oral coalface, a polo shirt with diamond-patterned tank top effect in your dental practice colours is available, the Birdie 2in1 Fairway 2000. In complement the Birdie Plus Fours have a tweed effect without the warm scratchy texture of traditional tweed – perfect for dentists who overheat during swift patient turnovers.

With Sound Scrubs' new range of 2in1 surgery-golf outfits, dentists juggling full appointment books with their favourite hobby can save valuable minutes getting changed and lugging heavy holdalls around, and be ambling through 18 holes in no time.

All uniform combinations are available in numerous colour ways and male and female sizes and fittings, and Sound Scrubs supplies matching knee socks, flat caps and also baseball caps for budding Justin Roses among the dental fraternity.

Sound Scrubs will be sending free samples of their surgery-golf attire to a selection of BDA Branches that arrange regular golf fixtures for members. For more details and to order from the full range, visit [www.soundscrubs.com/dentalbogey](http://www.soundscrubs.com/dentalbogey).

## Take control of errant saliva

Many patients have a habit of not spitting accurately into the chairside spittoon in surgery causing endless infection control issues, so get them in the right habit with the TiS spittoon.

The TiS is the latest innovation in patient engagement and comes in an elegant hygienic design, with brackets designed to fit most chairs. Its powerful suction ensures your patients will have a breath-taking and mouth-cleansing experience chairside.

Choose from an interior of a bullseye, a putting green, football nets or a choice of five of the world's most famous waterfalls. Patients can now dispense of their mouthrinse down Niagara Falls, Dunn's River Falls, or at the famous 'Amen Corner' at Augusta National.

The auto-timed flush and cup filler means even the most difficult of patients could have endless hours of fun in the chair. The TiS is also suitable for those who wish to choose between right- or left-sided spitting, with a fully supportive neck brace available for patients that wish to spit with vigour.

Child-friendly interiors include obstacle courses and water theme parks, with prizes available at a supplement for the best performing patients.

Get your patients spitting efficiently today! Visit [www.targetinspitoon.co.uk](http://www.targetinspitoon.co.uk) for further information.
