

# Dental products and services

Please send product news information and images to Kate Quinlan at [k.quinlan@nature.com](mailto:k.quinlan@nature.com), Product news is provided as a service to readers using text and images from the manufacturer, supplier or distributor and does not imply endorsement by the *BDJ*. Normal and prudent research should be exercised before purchase or use of any product mentioned.

## See more than meets the eye

GC's D-Light Pro is a dual wavelength LED cordless light developed to broaden the clinician's options.

With 20 second cycles at an output of 1400 mW/cm<sup>2</sup> and a dual wavelength, the High Power (HP) mode guarantees very efficient polymerisation of all light-cured materials, regardless of the photo-initiator used. The blue LED ensuring optimal activation of camphoroquinone and the violet LED curing other initiators like TPO and PPD.

The Low Power (LP) mode has a reduced 700 mW/cm<sup>2</sup> power output and is perfect when clinicians want to limit heat generation in deep cavities.

D-Light Pro's unique Detection (DT) mode uses near-UV light only. This violet mode, with a continuous 60 second irradiation, enables clinicians to spot what is not always visible to the naked eye, from infection of dentine to plaque and micro-leakage around old restorations etc.

Not designed to polymerise materials, it helps visualise bacterial activity and fluorescent materials. Areas displaying bacterial activity exhibiting a red fluorescence whilst healthy tooth structure shows a green fluorescence.

Finally, D-Light Pro offers efficient irradiation regardless of distance. This is important because in some clinical situations, especially in posterior areas, it is often not possible to place the curing light in ideal proximity to the material to be polymerised.

## Tackling every topic for clinicians

Connect Dental Campus is the latest online resource from Henry Schein Dental. Featuring an array of on-demand webinars, live webinars, product video guides and informative articles, this site tackles every topic that clinicians and technicians need to explore if they want to get ahead in the exciting world of digital dentistry. With a focus on implants, CAD/CAM, digital planning, intraoral scanning, restorative materials and more, there is something for everyone involved in the digital workflow, regardless of whether you work in practice or a laboratory. On-demand webinars feature highly experienced and engaging speakers, all experts in their fields, discussing all aspects of the digital workflow, implant planning, digital processes and CAD/CAM techniques.

In collaboration with industry partners 3Shape and Dentsply Sirona, visitors to the site can also learn from a wide selection of step-by-step video tutorial guides on digital implant planning, surgical guide solutions, shade matching and follow a variety of subjects covering CEREC's increasing clinical applications. This on-demand feature means these resources are available to view at a time that suits everyone.

Find out what Connect Dental Campus has to offer. Register for free today at [connectdentalcampus.co.uk](http://connectdentalcampus.co.uk) or call 01634 878750 for more information.

## New range of vibrant colours

J. H. Orsing, one of the world's leading producers of saliva ejectors, aspirator tubes and accessories, has launched a new range of colours for the world-renowned Hygoformic saliva ejector. The products are now available for adults in light blue, lime green, pink and the original white colour. Add more liveliness to your clinic today!

Hygoformic is a mouldable saliva ejector and has been used by dentists all over the world for more than 50 years. Hygoformic is produced in non-toxic and non-pollutive polyethylene and polypropylene and with a complete line of adaptors to meet all the requirements of modern dental clinics. Founded in the 1950s, Orsing has distinguished itself on the world market for high quality and user-friendly disposable products developed with the patient's highest comfort in mind.

Contact your local dealer for more information and to order the Hygoformic range. Find more product information at <http://orsing.se/products/saliva-ejectors-and-accessories/hygoformic-for-adults>.
