

Build a brighter surgery

Could your practice do with a little bit of colour? Surgery Express has just the thing.

The Vibrenté range of colourful dental consumables, available exclusively through Surgery Express, has a wide choice of different essential items in a variety of bright and bold colours. Products include: nitrile gloves, disposable bibs, squat cups, paper tray liners, disposable aspirator tips, saliva ejectors and face masks.

Whatever the colour scheme of your surgery, the Vibrenté range will have something to match. All of its high quality items are durable and cost effective, making it even easier to add a little bit of personality and flair into your practice.

The benefits of colourful equipment are limitless. Not only will your practice be able to strengthen its brand and aesthetic appeal, but the colours included in the Vibrenté range have been proven to help enhance mood – meaning your patients will benefit too!

To make the most of Surgery Express's first-rate service, order the Vibrenté range before 3 pm and receive guaranteed next-day delivery.

Style, comfort and functionality

If you're looking for a fully flexible, state of the art treatment centre, the new entry level INTEGRO Ambidextrous from Dentsply Sirona provides style, comfort and functionality to suit every practitioner. This latest fully functional treatment centre serves both right- and left-handed practitioners and features an outstanding ergonomic design and intelligent swivel mechanism, which means it can be effortlessly switched from right to left and vice versa in just 15 seconds.

The swivel mechanism is extremely straightforward. A switch on the water unit is released by foot and moved around the chair, with the backrest moving automatically to the correct position.

The operating light, monitor and dentist elements are quickly repositioned, a process that can easily be carried out between appointments. No screws need to be released or secured, meaning no special training or other equipment is required. The intuitive and precise swivel movement minimises the risk of damage to hoses or collision with other components.

Designed with your budget in mind, there are four INTEGRO Ambidextrous models available, offering outstanding value for money and Dentsply Sirona quality you can rely on. Contact Dentsply Sirona on 0800 072 3313 or visit dentsply.com/en-uk.

The latest generation of 3D printing

As a pioneer of CAD/CAM technology and specialist in dental processing techniques, BEGO is systematically developing its 3D printing system. The traditional family company presented the new smart Varseo S for labside 3D printing of restorations made from resins at the recent International Dental Show in Cologne. The extended VarseoWax material spectrum and the new BEGO Otoflash light-curing unit were shown as well. Validated processes and the associated process documentation provide security to the users to be 'MDR ready'.

The Varseo S is characterised by its compact and stylish design and a larger building plate, which ensures the simultaneous printing of even more objects. Additionally, the network capability of the device permits rapid BEGO Service via remote control. The high building speed is independent of the number of elements to be produced. The unique cartridge system allows a material change in seconds, low material consumption and minimal material ageing.

In addition to the tested VarseoWax resins for the production of CAD/Cast partial denture frames, surgical guides, dental models and individual impression trays, BEGO presented the new resin VarseoWax Splint E for 3D printing of occlusal splints at IDS. In the course of 2017,

BEGO is going to expand its range of resins by providing VarseoWax Base for 3D printing of full denture bases as well as VarseoWax Temp for 3D printing of long-term temporaries.

The new light-curing unit BEGO Otoflash allows a rapid and reliable light-curing of VarseoWax resins.

The comprehensive 3D printing service package includes a qualified hotline support and online access to the BEGO 3D Academy, which provides the Varseo user with information on 3D printing via video tutorials, webinars, tips and tricks.

More detailed information on the BEGO 3D printing system Varseo S can be found online at www.bego.com/3d-printing.
