

Perfectly position your patient

Belmont invites you to take a seat on one of its stunning treatment centres. Launching at Showcase will be an innovation designed to be as practical as it is impressive.

Their flagship Cleo II features a unique folding leg rest, which has a much smaller footprint than a conventional chair and is also far more familiar in design to patients, and thereby less intimidating.

For those requiring the flexibility of an ambidextrous unit, there's either the tbCompass or the Voyager III. With Belmont treatment centres you also have a huge array of colours from which to choose: 48 in total, so you can co-ordinate perfectly with the rest of your interior!

With your patient perfectly positioned, you need an operating light that will

provide a flooded area of illumination, with minimum heat transfer and white light, which most closely matches daylight. The 900 LED light from Belmont does just that.

Visit Belmont on stand H20 at BDIA Dental Showcase.

Learn live at Dental Showcase

Align Technology will be teaching delegates about the Invisalign system and iTero, its digital scanning technology, at BDIA Dental Showcase – at whatever stage of your understanding and knowledge of the system – from novice to more experienced provider.

Invisalign Go is a completely fresh approach to teeth straightening which takes general dentists new to Invisalign through identifying, planning and monitoring aesthetic cases. As a result it is enabling many more clinicians to use the system to treat patients confidently right from the word go. The new treatment model also includes ongoing access to expert providers, support, mentoring and perpetual learning opportunities. Because of these factors it is proving extremely popular, so much so that over 1,000 GPs have recently been trained on the Invisalign Go system.

Now Align Technology is planning to train yet more... live at Dental Showcase. The company is enlisting Aligner Consulting's Orthodontic Specialist Dr Raman Aulakh and Platinum Elite provider Barry Buckley to provide an Invisalign certification training course for GPs with no Invisalign experience.

To participate in the Invisalign Go Express course, simply visit stand M20 and pre-book your place. The course takes place at the Birmingham Hilton Metropole, on Saturday 21 October at 2-5 pm with Drs Raman Aulakh and Barry Buckley. The course fee for this express course is at a reduced rate of £495.

For those keen to secure a slot, pre-booking ahead of Showcase can be accomplished by speaking to your Territory Manager or visiting <http://www.invisalign-go.co.uk/>.

An implant revolution

The team at TBR is delighted to have the opportunity to exhibit at the BDIA Dental Showcase this October, where they hope to provide delegates with information about their range of advanced implant systems.

Exhibiting on stand O10, TBR will be showcasing the innovative Z1 implant, which is comprised of a unique combination of bio-compatible materials – titanium and zirconia. The one-of-a-kind construction of the Z1

implant allows for great clinical results, including improved soft tissue management and aesthetics.

Available in the UK through exclusive dealers, Dental Express, the implant systems from TBR are among the most advanced in the world – and the team will be keen to demonstrate this to visitors at the stand.

With over 30 years' experience in the design and manufacture of dental implants, TBR has been at the forefront of the implant revolution. To find out more about the range of exceptional products, be sure to visit the team on stand O10 at the BDIA Dental Showcase.

For more information visit Dental Express at www.dental-express.co.uk, call 01246 267500 or learn more about the Z1 implant at <http://z1implants.co.uk/>.

Interested in upgrading your autoclave?

Having been at the forefront of dental decontamination equipment design for over 50 years, Eschmann's Little Sister is a 'must-see' for any delegate visiting this year's BDIA Dental Showcase.

If you're interested in upgrading your washer disinfecter, autoclave or handpiece cleaner, Showcase is the perfect opportunity to find out more about Little Sister decontamination equipment, available from the UK's leading manufacturer.

While you're there, be sure to ask the team about Little Sister's Lifetime Breakdown Protection, free log book, CPD training and annual validation available with every purchase.

For more information on the highly effective and affordable range of decontamination equipment and products from Eschmann, visit www.eschmann.co.uk or call 01903 753322.
