

# Dental products and services

Please send product news information and images to Adrian O'Dowd at [adrian.odowd@nature.com](mailto:adrian.odowd@nature.com). Product news is provided as a service to readers using text and images from the manufacturer, supplier or distributor and does not imply endorsement by the *BDJ*. Normal and prudent research should be exercised before purchase or use of any product mentioned.

## Vitamin health boost

Following the Christmas and New Year festivities, January is a great time of year for people to focus on sugar-free alternatives when it comes to soft drinks and confectionery.

One of the largest truly independent health companies in the UK, Get More Vitamins makes sugar-free vitamin waters and new vitamin chewing gum.

Get More Vitamin Drinks are made with spring water, natural fruit flavours and contain less than ten calories. The drinks contain a daily dose of vitamins to keep levels topped in a convenient way.

Brand new Get More Multivitamin Chewing Gum has recently launched and is the first of its kind in the UK. Each piece provides 25% of the daily dose of ten vitamins in two sugar-free flavours – peppermint and spearmint.

Many Get More Vitamins

products contain vitamin D and calcium, which help to maintain healthy teeth. Get More Kids Multivitamin Drinks have recently relaunched in three great-tasting flavours, each containing six B-vitamins, vitamin D and calcium, and are available in handy 330 ml bottles.

Get More Vitamin Drinks and Get More Multivitamin Gum are available in leading retailers throughout the UK, such as Tesco, Sainsbury's and Asda, as well as online at [www.amazon.co.uk](http://www.amazon.co.uk).

For more information, please contact [info@getmorevits.com](mailto:info@getmorevits.com).

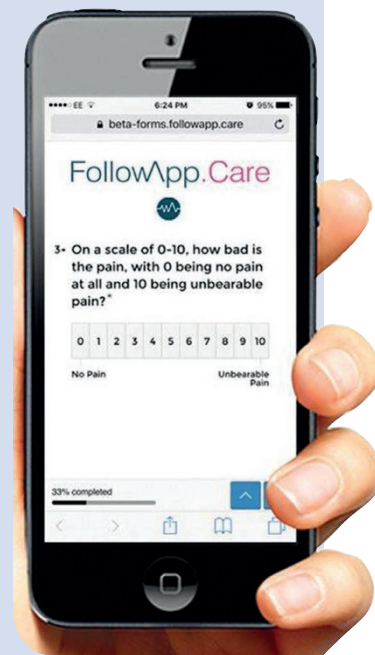

## Following up with FollowApp

EndoCare says it is particularly proud to have adopted the FollowApp system into its patient journey. This university-tested app allows its team of experienced endodontists to connect with patients post-treatment via their mobile phones, to offer dedicated aftercare and reassurance.

By answering a few simple questions by text, patients will be able to achieve complete peace of mind, allowing them to concentrate on getting better, rather than worrying over something that is perfectly normal.

Aftercare is important to EndoCare, which is why it partnered with the FollowApp team to provide this exceptional follow up service – meaning its patients receive uncompromising care from the moment they come through the door to the moment they are feeling better again.

For more information, please call EndoCare on 020 7224 0999 or visit [www.endocare.co.uk](http://www.endocare.co.uk).

## See dentistry in a different light

Precision is key when it comes to excavating caries, however, improvements in restorative materials mean that it is often difficult to see the margin between healthy tooth structure and common restorative materials.

The Fluoresce HD Dual Wavelength Coupling makes caries detection and removal easier as well as minimising the risk of removing healthy tooth structure.

During caries removal, the UV light causes porphyrins inside caries to fluoresce orange/red (and healthy tooth light green). The UV light also causes restorative materials such as resins, cements etc to appear a different colour.

Since you can see everything as you are working, caries removal becomes 'paint by numbers' simple – only remove what needs to be

removed, leaving healthy structure intact.

This two in one handpiece coupling is compatible with Kavo MULTIflex turbines and is similar in price to a standard LED coupling.

However, as well as performing the standard functions of an LED coupling, you'll also get a device that detects caries. The user needs to wear a yellow filter to see the caries. These are available as yellow tint glasses or as a yellow tint loupe insert if the operator prefers to use loupes. The glasses are provided free with the coupling and a small charge is made for the loupe insert.

Fluoresce HD is distributed exclusively through Dental Sky. For more information, visit [www.dentalsky.com](http://www.dentalsky.com).
