

A titan among tongue cleansers

TiTANIUM 2018 is this season's exciting addition to the AMANO range of tongue cleansers.

The TiTANIUM 2018 is made from 100% titanium – the 22nd element in the periodic table and named after the Greek gods, the Titans.

As befits its name, TiTANIUM is as strong as steel, but less than half the weight (hence why aircraft frames are now made from titanium).

The TiTANIUM 2018 thus offers a supremely smooth and effective performance – with a slightly lighter feel on the tongue – which some customers might prefer.

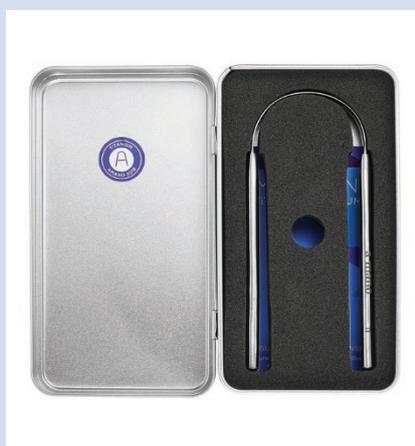

The other classic AMANO – the NeoClassic 2017 – is made from a nickel and chrome steel alloy. Some people are allergic to nickel and chrome, so the 100% pure TiTANIUM 2018 may be a more suitable variant for them.

Having designed and made tongue scrapers for 25 years, AMANO is keenly aware that the key to 'effectiveness' is not just about how 'sharp' the scraper is. On the contrary, an overly 'sharp' scraper will

actually put most people off the routine, whereas a 'comfortable' scraper will mean the user is more relaxed about using a tongue scraper with conviction – and that means also towards the back of the tongue, where oral debris tends to lurk. This means tongue scraping has more of a chance of becoming a new and effective daily routine.

In keeping with its status as the top of the range AMANO, the TiTANIUM 2018 also comes in a metallic presentation case.

Become a part of the Carrière Philosophy in orthodontics

Henry Schein Dental is hosting another exciting course led by renowned orthodontist Dr Luis Carrière: The Carrière Philosophy.

During this one-day course, Dr Luis Carrière will demonstrate how to correct Class II or Class III malocclusions at the beginning of treatment, before bracketing and when patient compliance levels are at their highest, providing unique efficiencies and resulting in minimal extractions. In addition, Dr Carrière will show delegates how to transition to a passive self-ligating system which provides efficiencies over traditional orthodontic methods.

Using case studies with before-and-after photos and clinical tips, this unique and innovative treatment approach addresses the total facial harmony of the patient and is a must-attend event for all dental professionals wanting to expand their treatment options in the field of orthodontics. The course is being held at 30 Euston Square, London NW1 on 29 June and offers 7 hours of CPD. Tickets cost £250 + VAT per delegate and places are limited, so book now to avoid disappointment.

For more information or to book your place visit hsdeducation.co.uk or call 01634 877599 today.

Be a wizard with your wand

No matter how good you are at delivering local anaesthesia, the chances are that your patients will still be very fearful of the procedure. Well, there's a way round it! The Wand is a computer controlled anaesthetic delivery system that pushes the anaesthetic solution of your choice through a needle. The rate and pressure of delivery allows you to get your anaesthetic to where it is needed without much of the traditional

discomfort/pain that is associated with using a syringe.

Dental Sky Academy are launching eCPD courses, led by Dr Richard Charon and Dr Mike Gow, aimed at both existing and new users of The Wand. The 6-hour course will cover clinical applications and will review techniques versus a traditional syringe. You will experience hands-on use of The Wand, including clinical tips and maintenance

advice. There will be no commitment to purchase a unit on the day. Each delegate will receive a free box of Wand handpieces worth £125 + VAT, which will offset most of the course fee of £135 + VAT. The course provides delegates with 6 hours of eCPD.

For tickets and more information call 0800 294 4700 or email events@dentalsky.com.

Last chance for bursary awards

For anyone hoping to enter the Association of Dental Groups' (ADG) Bursary Awards 2018 the final countdown is on. Undergraduate and postgraduate students have until midnight on 30 June to submit their application, after which an expert panel will judge all entries anonymously.

There are three categories in the competition: undergraduate 'Professionalism', undergraduate 'Innovation in Dental Care' and the postgraduate Award. For full details visit www.dentalgroups.co.uk/dentists/bursary-awards.html.

If you're interested or know someone that is, get started on your application today – you have to be in it to win it! Application forms are available to download now from www.dentalgroups.co.uk/dentists/bursary-forms.html.

For more information about the ADG visit www.dentalgroups.co.uk.
