CORRIGENDUM: Biological consequences of nanoscale energy deposition near irradiated heavy atom nanoparticles

Stephen J. McMahon, Wendy B. Hyland, Mark F. Muir, Jonathan A. Coulter, Suneil Jain, Karl T. Butterworth, Giuseppe Schettino, Glenn R. Dickson, Alan R. Hounsell, Joe M. O'Sullivan, Kevin M. Prise, David G. Hirst & Fred J. Currell

The authors have noticed that in the original version of this Article there was a typographical error in the Results section. The value quoted in the text for the fitting parameter C (1.5×10^{-14}) is actually the value of the function $C/(1 + d/d_0)^n$ for particles with $d=20$ nm, as plotted in Figure 5b. The correct value for the diameter-independent parameter C alone is $C = (8.8 \pm 0.4) \times 10^{-14}$. A similar normalisation error occurred in the quoted value of the parameter B , whose correct value is $B = (1.5 \pm 0.08) \times 10^{-14}$. This error only affected these values as quoted in the text and all figures and other comparisons made use of the correct parameters.
