CORRIGENDUM: A cellulose liquid crystal motor: a steam engine of the second kind

Yong Geng, Pedro Lúcio Almeida, Susete Nogueira Fernandes, Cheng Cheng, Peter Pálffy-Muhoray & Maria Helena Godinho

There are two typographical errors in the legend of Figure 1. The sentence, “Idealized chemical structure of hydroxypropylcellulose (HPC), R-CH₂CH(OR')CH₃ or -H (R' - H or -CH₂CH(OH)CH₃), with an average degree of substitution of 3.5” should read, “Idealized chemical structure of hydroxypropylcellulose (HPC), R-OCH₂CH(OR')CH₃ or -OH (R' - H or CH₂CH(OH)CH₃), with an average degree of substitution of 3.5”.
