SCIENTIFIC REPORTS

Corrigendum: Versatile multi-wavelength ultrafast fiber laser mode-locked by carbon nanotubes

Xueming Liu, Dongdong Han, Zhipei Sun, Chao Zeng, Hua Lu, Dong Mao, Yudong Cui & Fengqiu Wang

Scientific Reports 3:2718; doi: 10.1038/srep02718; published online 23 September 2013; updated on 20 July 2015

This Article contains typographical errors.

In the Results section under subheading ‘Nanotube-based compact all-fiber triple-wavelength laser system’, ‘The dispersion parameter of these three CFBGs is $\sim 2.2 \text{ ps}^2/\text{cm}$ with the length of $\sim 10 \text{ mm}$ ’ should read: ‘The dispersion parameter of these three CFBGs is $-2.2 \text{ ps}^2/\text{cm}$ with the length of $\sim 10 \text{ mm}$ ’.

In addition, ‘Fig. 1(d) shows the absorption spectrum of the SWNT–polycarbonate composite in comparison with pure polycarbonate’ should read: ‘Fig. 1(d) shows the absorption spectrum of the SWNT–PVA composite in comparison with pure PVA’.

In the caption of Fig. 1(d), ‘Absorption spectrum of the SWNT–polycarbonate composite and pure polycarbonate’ should read: ‘Absorption spectrum of the SWNT–PVA composite and pure PVA’. The figure legends in Fig. 1(d) ‘SWNT–polycarbonate’ and ‘Pure polycarbonate’ should read ‘SWNT–PVA’ and ‘Pure PVA’ respectively. The correct Fig. 1(d) appears below as Fig. 1.

Lastly, in the Methods section under subheading ‘Numerical simulation’, Equation (2) ‘ $g = g_0/\exp(-E_p/E_s)$ ’ should read: ‘ $g = g_0 \cdot \exp(-E_p/E_s)$ ’
