Erratum: Influence of substrate modulus on gecko adhesion

Mena R. Klittich, Michael C. Wilson, Craig Bernard, Rochelle M. Rodrigo, Austin J. Keith, Peter H. Niewiarowski & Ali Dhinojwala

Scientific Reports 7:43647; doi: 10.1038/srep43647; published online 13 March 2017; updated on 24 April 2017

This Article contains an error in the legend of Figure 2 where the symbols corresponding to calculations using the spring model are incorrectly given as solid shapes. The Figure and accompanying Figure legend appear below.

Figure 2. Average maximum shear force of adhesion for whole animals on cellulose acetate (◆) and PDMS (▲) substrates of varying composite moduli. Composite moduli are calculated from the spring model (◇, △) or from durometer measurements (◆, ▲), and are tabulated in Table 1. Values are means ± standard error, n = 7.
