Corrigendum: Cochlear gene therapy with ancestral AAV in adult mice: complete transduction of inner hair cells without cochlear dysfunction

Jun Suzuki, Ken Hashimoto, Ru Xiao, Luk H. Vandenberghe & M. Charles Liberman

Scientific Reports 7:45524; doi: 10.1038/srep45524; published online 3 April 2017; updated 22 May 2017

The authors forgot to cite previous studies relating to *in vivo* studies in newborn mice. These additional references are listed below as references 1 and 2, and should appear in the text as below.

In the Introduction section,

“In order to maximize transduction efficiencies, a “designer” AAV vector, AAV2/Anc80L65, was tested based on promising results in organotypic explant cultures”.

should read:

“In order to maximize transduction efficiencies, a “designer” AAV vector, AAV2/Anc80L65, was tested based on promising results in organotypic explant cultures and *in vivo* studies in newborn mice^{1,2}”.
