

Be a winner at the Science Museum

Have you ever fancied yourself as the next Sue Barker, Paula Radcliffe or Jonny Wilkinson? It's time to stop dreaming, says **Naomi Davis**.

The Science Museum is re-defining the concept of museum with its Science of Sport exhibition this summer.

The word 'interactive' has been taken to new levels at the exhibition, where visitors can dribble a football against the clock, climb an indoor rock face or race against each other in a sprint. You can even see an action replay. This is all achieved with the help of simulators and interactive displays.

The exhibition explores all things related to sport: coordination, ability, diet and exercise. You can learn about your own fitness by checking your pulse, measuring your height and weight and testing your reactions. And

for the less energetic there are displays about the inventions that have made sports people into record-breakers.

With the build up to the Olympics already started and Euro 2004 almost upon us, sport is going to be the next big thing this summer, so get ahead of the crowd and go see what the Science Museum is shouting about. You may even get to spend a moment in your hero's shoes.

What: Science of Sport Exhibition
When: Until 5 September 2004
Where: Science Museum, Exhibition Road, London
