GIVE ORAL HEALTH

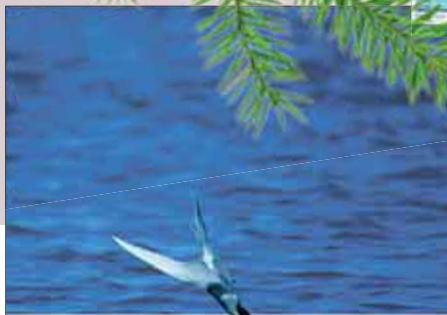

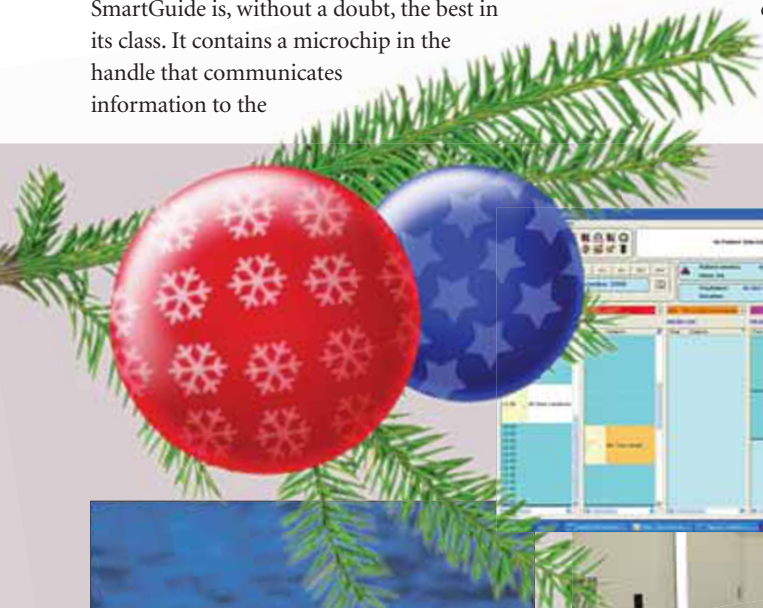

Inspire your patients for their Christmas shopping – suggest a power toothbrush which will give long-term benefits. Oral-B's power brushes are popular with hygienists and dentists. But there are still many patients who have yet to experience the benefits.

Oral-B is confident that their Triumph with SmartGuide is, without a doubt, the best in its class. It contains a microchip in the handle that communicates information to the

user via a remote display to ensure brushing effort is maximised. The duration is recorded and a timer ensures all areas of the mouth receive equal attention. There's no excuse for patients not to keep up the good work between appointments.

During November and December selected dental dealers will be giving away three Triumph with SmartGuide brushes for every eight ordered.

For more information telephone 020 7839 6730.

Deep down it works

FIGHT PERIODONTAL DISEASE

Dentomycin periodontal gel helps fight back against periodontal disease and is available in an easy to use pre-filled applicator, facilitating the treatment of calculus and plaque in deep, irregular pockets.

It reduces inflammation, destroys harmful bacteria, promotes healing, does not react with alcohol, and does not leave an aftertaste. It is indicated for moderate to severe adult periodontitis as an adjunct to scaling and root planing in pockets of 5 mm depth or greater.

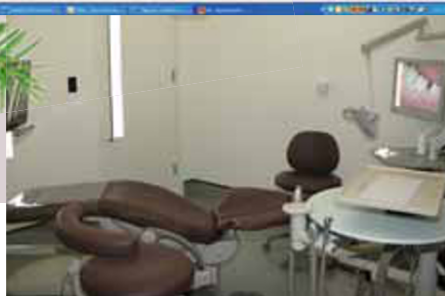

For more information telephone 07971 128077.

SUCCESSFUL SURGERIES

Make sure you benefit from Clark's 30 years' experience of surgery design and equipment to ensure you have a working environment which meets the latest regulations and guidelines.

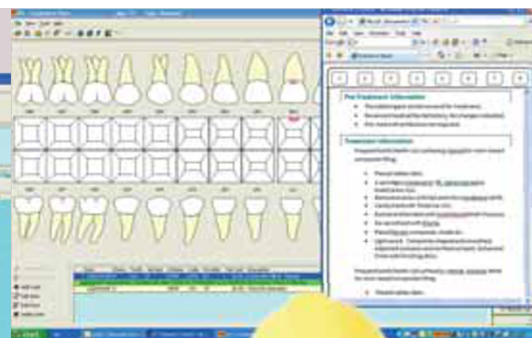

This leading company offers a range of superior equipment solutions, including MagnaVu, a versatile scope which solves the need for cameras, loupes, microscopes and illumination with 23X optical zoom and the highest resolution digital colour CCD camera chip.

Full equipment installation, training and aftercare are available seven days a week from trained and certificated engineers who can be contacted by mobile. Telephone 01268 733146 for further information.

STREAMLINED MANAGEMENT

The recently launched R4 Practice Management Software Version 3 is the latest upgrade in dental management from PracticeWorks. Customers can benefit from a number of features including: improved clinical notes and treatment entry; a new appointment diary so the receptionist can view as many appointment books as required and manage the dentists' time efficiently; and a report manager that will intelligently find you whatever report you require in seconds, highlighting financial and clinical information demonstrating any trends and areas that need improvement. Online booking is available for patients to book appointments over the internet, ideal for those who cannot call during opening hours.

CLEAN AIR ASSURED

Have you bought a cheap compressor only to find that when it goes wrong you have no support? Dental Air will not only sell you a cost-effective Piston and Scroll compressor with none of the drawbacks of old-fashioned oil-based systems, it will also provide nationwide support through a network of engineers who are fully certified and up-to-date on the latest regulations.

Dental Air offers a no-obligation on-site survey to dental practices in England, Scotland and Wales. This covers pipework, dryers, filtration and compressors.

They also provide a guide for practice managers. Telephone free on 0800 542 7575 for further information.
