

Genetics in Medicine

Corresponding Author Name: _____

Manuscript Number: _____

Reporting Checklist* (Please see page 3 for instructions on uploading this file)

This checklist is used to ensure good reporting standards and to improve the reproducibility of published results. **Please respond completely to all questions relevant to your manuscript. For sections that are not applicable please fill in NA.** For more information, please read the journal's [Guide to Authors](#).

Check here to confirm that the following information is available in the Material & Methods section:

- the **exact sample size (n)** for each experimental group/condition, given as a number, not a range;
- a **description of the sample collection** allowing the reader to understand whether the samples represent **technical or biological replicates** (including how many animals, litters, culture, etc.);
- a **statement of how many times the experiment shown was replicated in the laboratory**;
- **definitions of statistical methods and measures:** (For small sample sizes (n<5) descriptive statistics are not appropriate, instead plot individual data points)
 - very common tests, such as *t*-test, simple χ^2 tests, Wilcoxon and Mann-Whitney tests, can be unambiguously identified by name only, but more complex techniques should be described in the methods section;
 - are tests one-sided or two-sided?
 - are there adjustments for multiple comparisons?
 - **statistical test results**, e.g., **P values**;
 - definition of **'center values'** as **median or mean**;
 - definition of **error bars as s.d. or s.e.m. or c.i.**

Please ensure that the answers to the following questions are reported both **in the manuscript itself and in the space below**. We encourage you to include a specific subsection in the methods section each for statistics, reagents and animal models. Below, provide the text as it appears in the manuscript as well as the page number.

Statistics and general methods

1. How was the sample size chosen to ensure adequate power to detect a pre-specified effect size? (Give text and page #)

For animal studies, include a statement about sample size estimate even if no statistical methods were used.

2. Describe inclusion/exclusion criteria if samples or animals were excluded from the analysis. Were the criteria pre-established? (Give text and page #)

3. If a method of randomization was used to determine how samples/animals were allocated to experimental groups and processed, describe it. (Give text and page #)

For animal studies, include a statement about randomization even if no randomization was used.

Text AND page number from manuscript

4. If the investigator was blinded to the group allocation during the experiment and/or when assessing the outcome, state the extent of blinding. (Give text and page #)

--

For animal studies, include a statement about blinding even if no blinding was done.

--

5. For every figure, are statistical tests justified as appropriate?

--

Do the data meet the assumptions of the tests (e.g., normal distribution)?

--

Is there an estimate of variation within each group of data?

--

Is the variance similar between the groups that are being statistically compared? (Give text and page #)

--

Reagents

Text AND page number from manuscript

6. Report the source of antibodies (vendor and catalog number)

--

7. Identify the source of cell lines and report if they were recently authenticated (e.g., by STR profiling) and tested for mycoplasma contamination

--

Animal Models

Text AND page number from manuscript

8. Report species, strain, sex and age of animals

--

9. For experiments involving live vertebrates, include a statement of compliance with ethical regulations and identify the committee(s) approving the experiments.

--

10. We recommend consulting the ARRIVE guidelines ([PLoS Biol. 8\(6\), e1000412,2010](https://doi.org/10.1371/journal.pbio.1000412)) to ensure that other relevant aspects of animal studies are adequately reported.

Human subjects

- 11. Identify the committee(s) approving the study protocol.
- 12. Include a statement confirming that informed consent was obtained from all subjects.
- 13. For publication of patient photos, include a statement confirming that consent to publish was obtained. For more information, please see <http://www.icmje.org/recommendations/browse/roles-and-responsibilities/protection-of-research-participants.html>.
- 14. Report the clinical trial registration number (at ClinicalTrials.gov or equivalent).

Text AND page number from manuscript

- 15. For phase II and III randomized controlled trials, please refer to the [CONSORT statement](#) and submit the CONSORT checklist with your submission.
- 16. For tumor marker prognostic studies, we recommend that you follow the [REMARK reporting guidelines](#).

Data deposition

- 17. Provide accession codes for deposited data. Data deposition in a public repository is recommended for:
 - a. Protein, DNA and RNA sequences
 - b. Macromolecular structures
 - c. Crystallographic data for small molecules
 - d. Microarray data

Text AND page number from manuscript

--

Deposition is strongly recommended for many other datasets for which structured public repositories exist; more details on our data policy are available in the [Guide to Authors](#). We encourage the provision of other source data in supplementary information or in unstructured repositories such as [Figshare](#) and [Dryad](#). We encourage publication of Data Descriptors (see [Scientific Data](#)) to maximize data reuse.

- 18. If computer code was used to generate results that are central to the paper’s conclusions, include a statement in the Methods section under “**Code availability**” to indicate whether and how the code can be accessed. Include version information as necessary and any restrictions on availability.

--

* If an error is shown on the PDF built in Editorial Manager after including this Reporting Checklist take the following steps:

- 1. Open the original filled GIM-reporting-checklist.pdf with Mac Preview App
- 2. Goto Tray -> Export as PDF
- 3. Save as: at your desk (local computer) with a different file name
- 4. Close the app
- 5. In Editorial Manager: Edit the Submission which displayed Error or Incomplete Status and remove the file, then upload the new one, and again select to build the merged PDF
