

Join Novo Nordisk R&D for a life-changing career

Global leader in diabetes care

As the global leader in diabetes care, the patient is our focus when developing best-in-class treatments. Our success is built on more than 90 years of innovation and commitment. We combine world-class scientific, pharmaceutical and clinical expertise with the highest ethical standards to drive change to defeat diabetes and other serious chronic diseases – and help patients live life with as few limitations as possible.

From molecule to market

Our key contribution is to discover, develop and deliver better biological medicines. With a strong focus on innovation and decades of experience in researching, developing and manufacturing proteins, we explore new research areas and continuously turn science and technologies into next generations of efficacious and safe biological medicines for chronic diseases including diabetes, obesity, haemophilia and other chronic diseases.

Make a difference

Working at Novo Nordisk R&D is a mutually rewarding commitment. You will have the opportunity to make a significant difference to millions of patients who rely on us for cutting-edge treatment, while our consistent growth will provide you with professional development and career opportunities. We invite you to bring your personal ambition and passion to work and take tomorrow's research and clinical development to the next level.

Grow with us

The R&D organisation is vital to Novo Nordisk's continued growth. With over 5,500 employees located in R&D in Denmark, China, India, the US and UK, we offer an inspiring and ambitious global work environment with highly dedicated colleagues. Have you got what it takes to become part of this successful team?
