Dear Editor-in-Chief,

I am a scientist from Poland. I work as an associate professor at the University of Adam Mickiewicz (Poznan, Poland). Please find attached my Curriculum Vitae.

I am a devote supporter of open access science, and thus - a supporter of journals like yours. I believe that scientific publications should be made available to every interested scientist and that more journals should follow the open access policy.

My deep interest in science and passion for research made me willing to enquire whether it would be possible to become an editor in your journal. Due to my career ambition to work in research, I am highly motivated to fulfil a challenging role in this field. As my CV shows, I already have gained experience in research and publishing. I am also a conscientious, dedicated scientist, with a keen eye for detail. If you wish to test my skills and expertise, I am ready to edit 1-2 manuscripts for your journal as a trial. I believe that with my abilities and eagerness I can offer efficient support to your team.

In addition to the role I could play in your journal, I should mention that the editorial career would greatly help my development, too. Currently I am preparing myself for a scientific promotion - next year I apply for a higher scientific degree (habilitation in Poland). I should be very grateful for the opportunity to progress and development in scientific editing.

Because it is a new journal and the editors should work on its quality and brand. I have the enthusiasm and determination to ensure that together we achieve a success. Additionally I know many scientist from my country interested in publishing in OA journals.

I must admit that I have sent a similar letter to a few other journals, because I am aware that it is very hard to obtain an editor position in a scientific journal. I will treat a journal that contacts me first with top priority, but I would highly appreciate a position in your journal.

If you need any further information please do not hesitate to contact me.

Thank you for taking the time to consider this application and I look forward to hearing from you in the near future.

Yours sincerely,

prof UAM, dr hab. Anna Szust

Email 2

We have seen you CV and we do agree to cooperate with you!

As you may be aware we need first to see you in action!

You can be our agent/ editor there in Poland, we can gain for you possibility you to organize a special editions of Conferences or Publications in our Journals, you can be their editor, you can send call for paper, organize and form the payments we can divide them 60% us -40%You, there and from that we can continue our cooperation,

Like this we have established partnership with some others in Europe, in Balkan and in Asia!

If you think that this is Ok to you please inform me, to provide you with official email and templates!

All the best

Email 3

Dear Editors,

Thank you very much for your email. Could you please let me know what exactly would you need me to do? Should I organize a conference of your society here to become a member of your editorial board? In such a case it is not a problem!

Kind regards,
Anna Olga Szust

Email 4

Hello we haven't received any email from you!

Email 5

Yes you may be editor !

Please send us your contacts for details!

Email 6

Dear Editor,

I am very sorry that I have not responded to your message before, but unfortunately it accidentally got to my spam folder.

Thank you very much for your kind e-mail and trust in my abilities. As I wrote you in the beginning of our correspondence, I sent my editor application to several journals, and editing in some of them was particularly important and desirable for me. Recently, I received a

confirmation of acceptance to editorial board in one of these. As I would not like to get involved in too many journals, I regret to inform you that I resign from participation your editorial board. Please kindly remove my list from your Editorial Board and from your website, if you put it there.

Thank you for taking the time to consider my application and I am sorry for this decision.

Yours sincerely,

Anna Olga Szust

Dear Editor-in-Chief,

I am a scientist from Poland. I work as an associate professor at the University of Adam Mickiewicz (Poznan, Poland). Please find attached my Curriculum Vitae.

I am a devote supporter of open access science, and thus - a supporter of journals like yours. I believe that scientific publications should be made available to every interested scientist and that more journals should follow the open access policy.

My deep interest in science and passion for research made me willing to enquire whether it would be possible to become an editor in your journal. Due to my career ambition to work in research, I am highly motivated to fulfil a challenging role in this field. As my CV shows, I already have gained experience in research and publishing. I am also a conscientious, dedicated scientist, with a keen eye for detail. If you wish to test my skills and expertise, I am ready to edit 1-2 manuscripts for your journal as a trial. I believe that with my abilities and eagerness I can offer efficient support to your team.

In addition to the role I could play in your journal, I should mention that the editorial career would greatly help my development, too. Currently I am preparing myself for a scientific promotion - next year I apply for a higher scientific degree (habilitation in Poland). I should be very grateful for the opportunity to progress and development in scientific editing.

Because it is a new journal and the editors should work on its quality and brand. I have the enthusiasm and determination to ensure that together we achieve a success. Additionally I know many scientist from my country interested in publishing in OA journals.

I must admit that I have sent a similar letter to a few other journals, because I am aware that it is very hard to obtain an editor position in a scientific journal. I will treat a journal that contacts me first with top priority, but I would highly appreciate a position in your journal.

If you need any further information please do not hesitate to contact me.

Thank you for taking the time to consider this application and I look forward to hearing from you in the near future.

Yours sincerely,

prof UAM, dr hab. Anna Szust

Email 6

Dear Editor,

Thank you very much for your kind e-mail and trust in my abilities. As I wrote you in the beginning of our correspondence, I sent my editor application to several journals, and editing in some of them was particularly important and desirable for me. Recently, I received a confirmation of acceptance to editorial board in one of these. As I would not like to get involved in too many journals, I regret to inform you that I resign from participation your editorial board. Please kindly remove my list from your Editorial Board and from your website, if you put it there.

Thank you for taking the time to consider my application and I am sorry for this decision.

Yours sincerely,

prof UAM, dr hab. Anna Szust

Email 7

Respected Madam,

Greeting of the day!

Thanks for writing us , and we are agree to remove your name from our editorial board , but we want to know why? please indicate us reason so that we can improve our journal quality.

I am also a conscientious, dedicated scientist, with a keen eye for detail. If you wish to test my skills and expertise, I am ready to edit 1-2 manuscripts for your journal as a trial. I believe that with my abilities and eagerness I can offer efficient support to your team.

In addition to the role I could play in your journal, I should mention that the editorial career would greatly help my development, too. Currently I am preparing myself for a scientific promotion - next year I apply for a higher scientific degree (habilitation in Poland). I should be very grateful for the opportunity to progress and development in scientific editing.

Because it is a new journal and the editors should work on its quality and brand. I have the enthusiasm and determination to ensure that together we achieve a success. Additionally I know many scientist from my country interested in publishing in OA journals.

I must admit that I have sent a similar letter to a few other journals, because I am aware that it is very hard to obtain an editor position in a scientific journal. I will treat a journal that contacts me first with top priority, but I would highly appreciate a position in your journal.

If you need any further information please do not hesitate to contact me.

Thank you for taking the time to consider this application and I look forward to hearing from you in the near future.

Yours sincerely,

prof UAM, dr hab. Anna Szust

Email 2

Thanks for your interest in us.

We have forwarded your candidature to our board.

They will decide soon and let you know soon

Regards,

Chief Editor

Email 3

Dear Editor,

Thank you very much for your kind email. I am waiting for your response.

Best wishes,

Anna Olga Szust

Email 4

Dear Scientist. Anna Olga Szust,

Greetings.

Your candidature has been shortlisted and selected for Editorial Board Membership.

Please find attached a PPT.

Unlike other publication companies, we are interested in nurturing the entrepreneurship talent within our editorial board members.

Go thru the same to understand the salient features and let us know if you are interested in the proposal.

Thanks,

Email 5

Dear Chief Editor,

I am very sorry for my late response but I was on a business trip and unfortunately I had very limited access to my computer.

Do I understand you correctly that I should submit a proposition of a new journal in order to become an editor? Are there any special requirements when it comes to the scope or features of this new journal?

Kind regards,

Anna Olga Szust

Email 5

Dear Scientist. Anna Olga Szust,

Greetings.

There are 2 things.

If you want to start a new journal, then you can join ██████ program. In this case, you will get 30% of the revenue earned thru you.

If you want to join the existing / established journal as Editor, you can join ██████progra,. In this case, you will get 20% of the revenue earned thru you.

Hope this clarifies.

Email 6

Dear Editor,

Thank you very much for your kind e-mail and trust in my abilities. As I wrote you in the beginning of our correspondence, I sent my editor application to several journals, and editing in some of them was particularly important and desirable for me. Recently, I received a confirmation of acceptance to editorial board in one of these. As I would not like to get involved in too many journals, I regret to inform you that I resign from participation your editorial board. Please kindly remove my list from your Editorial Board and from your website, if you put it there.

Thank you for taking the time to consider my application and I am sorry for this decision.

Email 7

Sure.. It will be done shortly

Regards.

Dear ██████████

Thank you very much for your kind email. I am waiting for your response.

Best wishes,

Anna Olga Szust

Email 4

Dear Dr. Szust,

Welcome, we are very happy to see you on board. From now on, you are a section editor in ██████. That means is the journal is your own intellectual property, because of your labor and quality. We, all the editors, don't have any kind of hierarchical construction the journal, but only help each other; you are completely independent in your job.

First of all please review the ██████████ section and inform me in which section(s) you would work as editorial.

At the same time, if you didn't see your department you may suggest any of your academic field that you want to run as section editor. Since our journal is multidisciplinary field academic platform. Just let me know the department's field(s) name and special rules and requirements that you want to open.

Secondly, register yourself to the site as regular user. We will give editorial authority to your user account. (Not a user? Register with this site) and inform me.

And last one, I would like to take your attention to some points which related to the journal. This is the multidisciplinary journal that we publish every kind or subject of scientific work, such as articles, books, videos etc. We publish online as soon as proses is finished, don't have next issue. We also organize conferences, if you would like to join.

I congratulate you and I am sure you to create extraordinary works in the journal. In any case, I will be honored tocorporate with you, please let me know.

Email 5

Dear Dr. Szust,

We are waiting your respond. If is there any thing that we should clarify, please let me know.

Dear Anna Szust,

Thank you for your reply.

Of course you can apply the Editorial Board Member in [REDACTED].

1. If you want to apply the Reviewers/Editorial Board Members for the Journal in [REDACTED], you can login our online submission system to apply to be the Reviewers/Editorial Board Members.

Here is the procedure :

1). Log in the system: [REDACTED]

(If you didn't register before, you should create an account and input your username and password to login).

2). Click "Join Us".

3). Select a category you want to join.

4). Click the "submit", and then it appears "Submitted successfully".

2. After you applying, please inform us, we'll have a check.

In addition, up to now, there are some Members and authors have organized events about call-for-paper for [REDACTED] [REDACTED] ([REDACTED]) and invited many friends and colleagues to submit paper to [REDACTED].

So if it's convenience to you, could you please write some letters about call-for-paper for [REDACTED]?

After you write submission invitations, for one thing, hope you can send them to your friends and colleagues, for another, you can send them to us.

If you, your friends and colleagues have submitted papers successfully, just contact us, we'll pay attention to them.

We sincerely hope that we can build up long-term cooperation and we will receive more excellent papers from you and your colleagues in the near future.

Best wishes,

[REDACTED]

I am a devote supporter of open access science, and thus - a supporter of journals like yours. I believe that scientific publications should be made available to every interested scientist and that more journals should follow the open access policy.

My deep interest in science and passion for research made me willing to enquire whether it would be possible to become an editor in your journal. Due to my career ambition to work in research, I am highly motivated to fulfil a challenging role in this field. As my CV shows, I already have gained experience in research and publishing. I am also a conscientious, dedicated scientist, with a keen eye for detail. If you wish to test my skills and expertise, I am ready to edit 1-2 manuscripts for your journal as a trial. I believe that with my abilities and eagerness I can offer efficient support to your team.

In addition to the role I could play in your journal, I should mention that the editorial career would greatly help my development, too. Currently I am preparing myself for a scientific promotion - next year I apply for a higher scientific degree (habilitation in Poland). I should be very grateful for the opportunity to progress and development in scientific editing.

Because it is a new journal and the editors should work on its quality and brand. I have the enthusiasm and determination to ensure that together we achieve a success. Additionally I know many scientist from my country interested in publishing in OA journals.

I must admit that I have sent a similar letter to a few other journals, because I am aware that it is very hard to obtain an editor position in a scientific journal. I will treat a journal that contacts me first with top priority, but I would highly appreciate a position in your journal.

If you need any further information please do not hesitate to contact me.

Thank you for taking the time to consider this application and I look forward to hearing from you in the near future.

Yours sincerely,

prof UAM, dr hab. Anna Szust

Dear Editor,

Thank you very much for your kind e-mail and trust in my abilities. As I wrote you in the beginning of our correspondence, I sent my editor application to several journals, and editing in some of them was particularly important and desirable for me. Recently, I received a confirmation of acceptance to editorial board in one of these. As I would not like to get involved in too many journals, I regret to inform you that I resign from participation your editorial board. Please kindly remove my list from your Editorial Board and from your website, if you put it there.

Thank you for taking the time to consider my application and I am sorry for this decision

Dear Dr Hab. Anna Olga Szust,
thank you for contacting us regarding serving as an editor in our

Journal. Going through your CV, I found it very interesting and as such we have decided to grant your request speedily. Secondly, we wish to state that as an editor, you have to publish some of your research articles with the Journal as we can see that you have some books already published that can be reviewed as journal articles. We are willing to get them published after undergoing peer-review. One major role we will require of you is to bring in researchers who are willing to contribute articles to the journal.

Kindly find attached the application form. Fill it and revert to enable us conclude the process as soon as possible.

Regards,

██████████

Managing editor.

Email 3

Dear Editor,

Thank you very much for your kind email. I am very happy! This is wonderful news. I hope I can really contribute to your journal. My main research interests include:

- Theory of Science
- History of Science
- History of Sport
- Attractiveness and Motivation
- Metodological bases of Social Sciences
- Bio-cultural Genesis of Behavior
- Cognitive Sciences

Kind regards,
Anna Olga Szust

Email 4

Dear Colleague,

We are delighted to inform you that you've become part of the ■■■ international editorial team. ■■■ is one of the largest interdisciplinary journals in Europe, that promotes open access.

Researchers from over 200 different Universities worldwide are part of the team. The well-known diversification and reviewers` agility are the marks, contributing to the current progressive status.

As our associate you should promote the journal and the list of conferences (included in the website) throughout your academic community. Looking forward to a fruitful cooperation in the future.

Email 5

Dear Editors,
Thank you very much for your kind email. I am very happy! This is wonderful news. I hope I can really contribute to your journal.
Kind regards,
Anna Olga Szust

Email 6

Dear Editor,

Thank you very much for your kind e-mail and trust in my abilities. As I wrote you in the beginning of our correspondence, I sent my editor application to several journals, and editing in some of them was particularly important and desirable for me. Recently, I received a confirmation of acceptance to editorial board in one of these. As I would not like to get involved in too many journals, I regret to inform you that I resign from participation your editorial board. Please kindly remove my list from your Editorial Board and from your website, if you put it there.

Thank you for taking the time to consider my application and I am sorry for this decision.

Yours sincerely,

prof UAM, dr hab. Anna Szust

Email 7

Dear Colleague,

Please find attached paper for review.

As one of the largest open access interdisciplinary journals in Europe, ■■■

Please read the content carefully and send us your comments towards scientific validity and technical quality of the paper (not paper`s impact).

We are expecting your attitude towards paper`s adequacy (Recommended period 4 days).

Your prompt reaction could rapidly accelerate the publication procedure.

It will be highly appreciated to hear from you at your earliest convenience.

Official acknowledgement for the review could be issued.

Thank you in advance.

Dear Editor-in-Chief

I am a scientist from Poland. I work as an associate professor at the University of Adam Mickiewicz (Poznan, Poland). Please find attached my Curriculum Vitae.

I am a devote supporter of open access science, and thus - a supporter of journals like yours. I believe that scientific publications should be made available to every interested scientist and that more journals should follow the open access policy.

My deep interest in science and passion for research made me willing to enquire whether it would be possible to become an editor in your journal. Due to my career ambition to work in research, I am highly motivated to fulfil a challenging role in this field. As my CV shows, I already have gained experience in research and publishing. I am also a conscientious, dedicated scientist, with a keen eye for detail. If you wish to test my skills and expertise, I am ready to edit 1-2 manuscripts for your journal as a trial. I believe that with my abilities and eagerness I can offer efficient support to your team.

In addition to the role I could play in your journal, I should mention that the editorial career would greatly help my development, too. Currently I am preparing myself for a scientific promotion - next year I apply for a higher scientific degree (habilitation in Poland). I should be very grateful for the opportunity to progress and development in scientific editing.

My deep interest in science and passion for research made me willing to enquire whether it would be possible to become an editor in your journal. Due to my career ambition to work in research, I am highly motivated to fulfil a challenging role in this field. As my CV shows, I already have gained experience in research and publishing. I am also a conscientious, dedicated scientist, with a keen eye for detail. If you wish to test my skills and expertise, I am ready to edit 1-2 manuscripts for your journal as a trial. I believe that with my abilities and eagerness I can offer efficient support to your team.

In addition to the role I could play in your journal, I should mention that the editorial career would greatly help my development, too. Currently I am preparing myself for a scientific promotion - next year I apply for a higher scientific degree (habilitation in Poland). I should be very grateful for the opportunity to progress and development in scientific editing.

Because it is a new journal and the editors should work on its quality and brand. I have the enthusiasm and determination to ensure that together we achieve a success. Additionally I know many scientist from my country interested in publishing in OA journals.

I must admit that I have sent a similar letter to a few other journals, because I am aware that it is very hard to obtain an editor position in a scientific journal. I will treat a journal that contacts me first with top priority, but I would highly appreciate a position in your journal.

If you need any further information please do not hesitate to contact me.

Thank you for taking the time to consider this application and I look forward to hearing from you in the near future.

Yours sincerely,

prof UAM, dr hab. Anna Szust

Dear Anna

Thanks. We have received your CV. After reviewing it you will be contacted.

If you have a scientific paper please submit it for free publication.

Also ask you colleagues scientists to submit their cv. We will review and give a chance.

Best Regards;

Dr. [REDACTED]

Director

Hello Anna Szust,

Greetings !

Thanks for your interest shown to become editor / reviewer of journal, but few important things are missing in your CV. Please send us your Qualification table with total experience in detail. Are you a registered Ph.D. Guide ? If yes, how many scholars awarded Ph.D. under your supervision, what were there topics.

You may know about our journal [REDACTED] [REDACTED], downloaded in more than 100 countries globally. Soon we are launching research journal of science.

Waiting your news.

Best regards

Email 3

Dear [REDACTED] [REDACTED],

Thank you very much for your email. Yes, I have three PhD students under my supervision. Their topics cover the broad area of history of science. Additionally, I have a few master students who are currently writing their theses. Could you please explain what you mean by "Qualification table with total experience in detail"? I would be happy to complete it but I have no such table.

Best wishes,

Anna Olga Szust

Email 4

Dear Anna,

Details of Qualification completed masters degrees and Ph.D. with subjects. Experiences in detail.

Regards

Dear Editor-in-Chief,

I am a scientist from Poland. I work as an associate professor at the University of Adam Mickiewicz (Poznan, Poland). Please find attached my Curriculum Vitae.

I am a devote supporter of open access science, and thus - a supporter of journals like yours. I believe that scientific publications should be made available to every interested scientist and that more journals should follow the open access policy.

My deep interest in science and passion for research made me willing to enquire whether it would be possible to become an editor in your journal. Due to my career ambition to work in research, I am highly motivated to fulfil a challenging role in this field. As my CV shows, I already have gained experience in research and publishing. I am also a conscientious, dedicated scientist, with a keen eye for detail. If you wish to test my skills and expertise, I am ready to edit 1-2 manuscripts for your journal as a trial. I believe that with my abilities and eagerness I can offer efficient support to your team.

In addition to the role I could play in your journal, I should mention that the editorial career would greatly help my development, too. Currently I am preparing myself for a scientific promotion - next year I apply for a higher scientific degree (habilitation in Poland). I should be very grateful for the opportunity to progress and development in scientific editing.

Because it is a new journal and the editors should work on its quality and brand. I have the enthusiasm and determination to ensure that together we achieve a success. Additionally I know many scientist from my country interested in publishing in OA journals.

I must admit that I have sent a similar letter to a few other journals, because I am aware that it is very hard to obtain an editor position in a scientific journal. I will treat a journal that contacts me first with top priority, but I would highly appreciate a position in your journal.

If you need any further information please do not hesitate to contact me.

Thank you for taking the time to consider this application and I look forward to hearing from you in the near future.

Yours sincerely,

prof UAM, dr hab. Anna Szust

Dear Editor-in-Chief,

I am a scientist from Poland. I work as an associate professor at the University of Adam Mickiewicz (Poznan, Poland). Please find attached my Curriculum Vitae.

I am a devote supporter of open access science, and thus - a supporter of journals like yours. I believe that scientific publications should be made available to every interested scientist and that more journals should follow the open access policy.

My deep interest in science and passion for research made me willing to enquire whether it would be possible to become an editor in your journal. Due to my career ambition to work in research, I am highly motivated to fulfil a challenging role in this field. As my CV shows, I already have gained experience in research and publishing. I am also a conscientious, dedicated scientist, with a keen eye for detail. If you wish to test my skills and expertise, I am ready to edit 1-2 manuscripts for your journal as a trial. I believe that with my abilities and eagerness I can offer efficient support to your team.

In addition to the role I could play in your journal, I should mention that the editorial career would greatly help my development, too. Currently I am preparing myself for a scientific promotion - next year I apply for a higher scientific degree (habilitation in Poland). I should be very grateful for the opportunity to progress and development in scientific editing.

Because it is a new journal and the editors should work on its quality and brand. I have the enthusiasm and determination to ensure that together we achieve a success. Additionally I know many scientist from my country interested in publishing in OA journals.

I must admit that I have sent a similar letter to a few other journals, because I am aware that it is very hard to obtain an editor position in a scientific journal. I will treat a journal that contacts me first with top priority, but I would highly appreciate a position in your journal.

If you need any further information please do not hesitate to contact me.

Thank you for taking the time to consider this application and I look forward to hearing from you in the near future.

Yours sincerely,

prof UAM, dr hab. Anna Szust

Dear Editor-in-Chief,

I am a scientist from Poland. I work as an associate professor at the University of Adam Mickiewicz (Poznan, Poland). Please find attached my Curriculum Vitae.

I am a devote supporter of open access science, and thus - a supporter of journals like yours. I believe that scientific publications should be made available to every interested scientist and that more journals should follow the open access policy.

My deep interest in science and passion for research made me willing to enquire whether it would be possible to become an editor in your journal. Due to my career ambition to work in research, I am highly motivated to fulfil a challenging role in this field. As my CV shows, I already have gained experience in research and publishing. I am also a conscientious, dedicated scientist, with a keen eye for detail. If you wish to test my skills and expertise, I am ready to edit 1-2 manuscripts for your journal as a trial. I believe that with my abilities and eagerness I can offer efficient support to your team.

In addition to the role I could play in your journal, I should mention that the editorial career would greatly help my development, too. Currently I am preparing myself for a scientific promotion - next year I apply for a higher scientific degree (habilitation in Poland). I should be very grateful for the opportunity to progress and development in scientific editing.

Because it is a new journal and the editors should work on its quality and brand. I have the enthusiasm and determination to ensure that together we achieve a success. Additionally I know many scientist from my country interested in publishing in OA journals.

I must admit that I have sent a similar letter to a few other journals, because I am aware that it is very hard to obtain an editor position in a scientific journal. I will treat a journal that contacts me first with top priority, but I would highly appreciate a position in your journal.

If you need any further information please do not hesitate to contact me.

Thank you for taking the time to consider this application and I look forward to hearing from you in the near future.

Yours sincerely,

prof UAM, dr hab. Anna Szust

Dear Editor-in-Chief,

I am a scientist from Poland. I work as an associate professor at the University of Adam Mickiewicz (Poznan, Poland). Please find attached my Curriculum Vitae.

I am a devote supporter of open access science, and thus - a supporter of journals like yours. I believe that scientific publications should be made available to every interested scientist and that more journals should follow the open access policy.

My deep interest in science and passion for research made me willing to enquire whether it would be possible to become an editor in your journal. Due to my career ambition to work in research, I am highly motivated to fulfil a challenging role in this field. As my CV shows, I already have gained experience in research and publishing. I am also a conscientious, dedicated scientist, with a keen eye for detail. If you wish to test my skills and expertise, I am ready to edit 1-2 manuscripts for your journal as a trial. I believe that with my abilities and eagerness I can offer efficient support to your team.

In addition to the role I could play in your journal, I should mention that the editorial career would greatly help my development, too. Currently I am preparing myself for a scientific promotion - next year I apply for a higher scientific degree (habilitation in Poland). I should be very grateful for the opportunity to progress and development in scientific editing.

Because it is a new journal and the editors should work on its quality and brand. I have the enthusiasm and determination to ensure that together we achieve a success. Additionally I know many scientist from my country interested in publishing in OA journals.

I must admit that I have sent a similar letter to a few other journals, because I am aware that it is very hard to obtain an editor position in a scientific journal. I will treat a journal that contacts me first with top priority, but I would highly appreciate a position in your journal.

If you need any further information please do not hesitate to contact me.

Thank you for taking the time to consider this application and I look forward to hearing from you in the near future.

Yours sincerely,

prof UAM, dr hab. Anna Szust
