

Publishing my article with Palgrave Communications was a terrific experience. Being a broad-interest journal, my article was seen by scholars outside my immediate discipline as well as people outside the academy, an increasingly important factor these days and a very attractive aspect for me.

Professor Mark D. White,
College of Staten Island / CUNY, US

Working with Palgrave Communications exposes one to high quality, topical, interdisciplinary, and most importantly, accessible research. Helping with the Global Governance collection as an associate editor and a reviewer has been very beneficial. The process is professional, well guided by the managing editor, and the published work is of the highest quality.

Dr. Nick Anguelov,
University of Massachusetts, Dartmouth, US

As authors exploring interdisciplinarity in the making, the ease and rapidity with which we could publish open access in Palgrave Communications allowed us to unfurl our ideas and methods, to a wide community of other scholars and practitioners, actually as they are taking form.

Dr Felicity Callard,
Durham University, UK

For anyone working in a cross-disciplinary, policy-relevant field, Palgrave Communications is an ideal open access platform from which to engage fellow scholars, and also the wider worlds of policy and practice.

Professor James Wilsdon,
University of Sheffield and Chair of the Campaign for Social Science, UK

My experience of working with Palgrave Communications has been great; very efficient and well organised. It provides an excellent platform for new work with a professional, robust set of procedures leading to speedy publication following a rigorous review process.

Professor Kath Woodward
Open University, UK

Open access funding support service

Palgrave Macmillan offers a free open access support service to make it easier for our authors to discover and apply for APC funding. We can:

- Provide personal information on the open access funds available to you.
- Direct you to the correct open access funding coordinator at your institution/ funding body.
- Provide advice about compliance with funders' and institutions' open access policies.
- Supply you with the information and advice required to complete an open access funding application.

A number of research funders and institutions now make funding available to support OA monographs. The Palgrave Macmillan funding support service can provide personal advice on what OA monograph funding is available to you.

There are over 150 journal open access article processing charge (APC) funds available to HSS researchers world wide.

For open access books, pivots, journals and funding enquiries email:

openaccess@palgrave.com

Or visit: www.palgrave.com/open

For office locations and further contact information visit:

OPEN ACCESS GLOSSARY

Gold open access - articles freely available immediately upon publication on publisher's website - no embargo period. APC applicable*

Green open access - articles are made available by archiving in an institutional or subject repository - embargo period may apply, depending on the publisher's self-archiving policy.

*Article Processing Charge (APC) - a fee that is charged to authors in order to publish an article in an open access academic journal. This fee covers the costs associated with the publishing process.

palgraveopen

Offering authors the option to publish open access research across a variety of formats including, journal articles, monographs and Palgrave Pivot publications ensuring your research is made freely available to the widest audience possible.

ABOUT PALGRAVE OPEN

Palgrave Macmillan offers open access options for authors across a variety of formats including, journal articles, books/monographs and Palgrave Pivot publications (mid-form monographs) via Palgrave Open. As an active participant in the development of sustainable models for open access across the humanities and social sciences, Palgrave Macmillan was one of the first publishers to offer an open access option across these disciplines.

Why publish open access?

Global readership and copyright retention

Readers worldwide can share and reuse articles published open access using the Creative Commons Attribution (CCBY) license*, ensuring maximum reuse as well as enabling authors to retain copyright for their work.

Professional and rigorous peer-review process

The opportunity to publish via Palgrave Open is only offered to authors whose articles have already been accepted for publication. All open access content published adheres to the high standards expected of all Palgrave Macmillan publications. They undergo the same rigorous peer-review process, copyediting and proofreading services as all our titles.

Increased visibility and discoverability of research, and increasing interdisciplinary conversation

Palgrave Open articles are made freely available online via Palgrave-journals.com and can be downloaded, reused, reprinted and distributed, thus increasing the visibility of research. Furthermore, studies** have shown that research published open access is viewed more than work only available to subscribers, and is cited more often.

Efficient, online submission and tracking

We are committed to providing an efficient service for both authors and readers, and have developed advanced online systems to facilitate rapid peer-review and publication of research. With the support of teams of internal editors, and a large network of reviewers, we ensure manuscripts are processed for publication as quickly as possible and that authors get the support and information they need throughout the process.

Compliance with funder mandates

Publishing open access via Palgrave Open supports compliance with worldwidens funders' open access policies, including those of RCUK and Wellcome Trust.

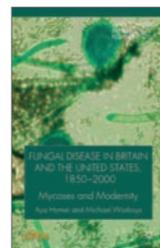

*Preferred by many research funding bodies, the CCBY licence allows readers to alter, transform, or build upon the article and then distribute the resulting work as long as the original work is correctly cited. Palgrave Macmillan was the first humanities and social science publisher to offer this licence across all publication formats.

**Research Information network 2014

Open access timeline at Palgrave Macmillan

June 2011 Palgrave Macmillan took the lead in offering open access across 18 of its academic journals. Today, the portfolio has now expanded to includes over 40 journals with the open access option.

November 2013
The first open access monograph was published.

July 2014 The first 'hybrid' open access chapter was published.

October 2014 The first open access Palgrave Pivot was published.

Benefits of publishing your next book open access with Palgrave Macmillan:

- All our open access books adhere to the rigorous peer review process Palgrave Macmillan is renowned for.
- As with journal articles all open access book content is made freely available immediately on publication.
- Print copies are available on demand for those who wish to purchase the research in hardcopy.

Palgrave have done a great job of showing that [the book is open access] clearly in the catalogue text and when distributing to bookshops. It's not half-hearted open-access-but-don't-tell-too-many-people-about-it, Palgrave is unabashedly proud to be publishing an open access book.

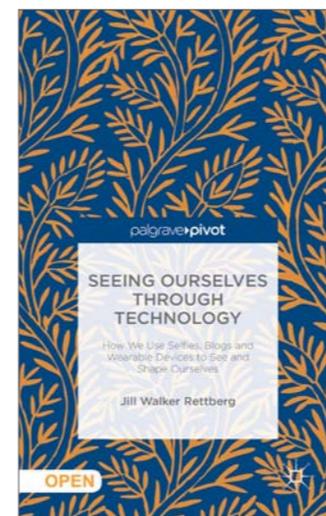

Jill Walker Rettberg
Professor of Digital Culture at the University of Bergen

January 2013

The open access option was expanded to include monographs and Palgrave Pivots. This was made possible through a books processing charge, which is usually paid for by research funders. The default license for our open access books is CC-BY, but other licenses are available on request.

January 2015 *Palgrave Communications*, the first fully open access multidisciplinary journal was launched.

www.palgrave.com/open

palgrave communications

Launched in 2015, *Palgrave Communications* is an open access online-only journal dedicated to publishing high-quality original research. The scope of the journal reflects Palgrave Macmillan's strengths in the humanities, the social sciences and business studies.

Article types

In addition to publishing original **research**, **reviews**, and **comments** across 30+ disciplines within the humanities, social sciences and business studies, the journal regularly features thematic collections covering hot and emerging areas of debate and research identified by members of its esteemed editorial board. These collections are guest-edited by experts and provide a forum for current thinking in the field.

Editorial Board

The Editorial Board comprises distinguished academics and researchers from a wide spectrum of fields. This broad representation and deep expertise helps ensure that *Palgrave Communications* meets and reacts to the varying needs of these communities. The Editorial Board includes a panel of Associate Editors who have responsibility for overseeing the peer review of manuscripts and recommending final decisions following assessment. The Managing Editor, in consultation with the Editorial Board, guides the development, policies, standards and editorial scope of *Palgrave Communications*.

Why choose *Palgrave Communications* for your research:

Quality: Reflecting its breadth of coverage, the journal is supported by a large, international, cross-disciplinary Editorial Board of leading researchers.

Peer review: Our in-house editorial team, led by the Managing Editor oversees the editorial and peer-review process, guided by the Editorial Board, and our selected reviewers.

High quality copy editing and typesetting: Production values that you would expect from award-winning Palgrave Macmillan.

Speed: Online-only offers author a continuous and faster publication format.

Improved HTML full-text article view: In addition to PDF availability, the layout and navigation of online articles in HTML allows for an improved incorporation and display of references, figures and tables, video, multimedia and supplementary information.

Article level metrics: Using Altmetric.com, readership data and citation information, authors can see how their research is being used and commented on across the scholarly literature, the wider internet and social networks.

No format limits: No word limits, colour or figure charges.

Commitment to interdisciplinary research

Interdisciplinary research is increasingly considered crucial in seeking out solutions to global social, environmental and economic challenges. As well as being a multi-disciplinary journal, *Palgrave Communications* is dedicated to providing a forum for the publication of interdisciplinary research.
